

AGRICULTURE WASTE MANAGEMENT IN MALAYSIA

By

AZA AZMIMA BINTI ANUAR

**Final Project Submitted in Partial Fulfillment for the
Diploma in Wood Industry, Faculty of Applied Science,
Universiti Teknologi Mara**

March 2002

ACNOWLEDGEMENTS

I would like to express my deepest appreciation sincere gratitude to my advisor, Miss Mazlin Binti Kusin for his encouragement and guidance in designing and implementing this project.

Sincere thanks also due to Assoc. Prof. Dr. Jamaludin Kasim, Program Head of Diploma in Wood Industry, UiTM Pahang, and En. Wan Mohd Nazri Wan Abdul Rahman for kindly extending all facilities and cooperation given during the course of study.

Thanks are also due to my beloved parents and my lover for their moral and financial support throughout the years study. I also would like to extend my appreciation to those who are involved either directly or indirectly in completing this project. I believed, without their helps, I would not be able to complete this final project.

AGRICULTURE WASTE MANAGEMENT IN MALAYSIA

By

Aza Azmima Binti Anuar

March 2002

ABSTRACT

In this decade, there was many activities were contribute environment pollution. The pollution causes by waste material and picking left from the activities was done for develop Malaysia infrastructures. The activities are important as an alternative to help development of Malaysia. With out it, Malaysia economies will not in stability. Like other activities, agriculture activities also contribute some pollution for environment. Whatever the activities is, there must have some pollution. Wasting must happen on agriculture activities. This is because in perform the agriculture activities, wasting material will happen.

By that, each country must take seriously to avoid the waste material from agriculture activities. Begin from agriculture activities, hopefully the decreased on waste, we will get latter. The examples of manage the agriculture waste will hopefully help the other activities to become less their waste.
