## **1.0 INTRODUCTION**

### **1.1 BUSINESS DESCRIPTION**

The reason we chose the name ThermoSwitch Enterprise is that the word "ThermoSwitch" strongly implies that it focuses on temperature control or sensing technology. Because the prefix "Thermo" is derived from the Greek word "thermos," meaning "heat" or "hot," it instantly links the company to temperature-related problems. Since the word "switch" describes a device that may change states, the company may manufacture or employ temperature sensors or switches to control a variety of systems. This might encompass anything from industrial equipment and thermostats to medical devices and smart home solutions.

ThermoSwitch Enterprise is a vibrant business committed to creating cutting-edge, environmentally friendly solutions for contemporary hydration requirements. Understanding the increasing need for adaptability and ease in daily life, we work to develop goods that fit easily into hectic schedules while having as little of an impact as possible on the environment. Providing superior, easy-to-use products that improve the customer experience is at the heart of our guiding principles. Our cutting-edge technologies are made to realise our belief that staying hydrated should be simple and pleasurable. ThermoSwitch Enterprise is dedicated to ongoing research and development in order to maintain its leadership position in the hydration sector. In order to reduce our environmental impact and promote a better future, we give sustainability top priority in the design and production of our products.

Our company's locations are Grand Mezzanine, 8, Jalan Indah 15/2, Taman Bukit Indah, 81200 Johor Bahru, Johor Darul Ta'zim, Floors 1, 7. It is because this location is very strategic and easy for people to come with their own transport or public transport.

The reason why we selected this business is because we are always balancing work, education, and a host of other obligations in today's hectic environment. We frequently do not have enough time to enjoy our drinks at the perfect temperature because of this. An inventive answer to this frequent problem is provided by ThermoSwitch Enterprise. ThermoSwitch, our main product, is a smart tumbler made to satisfy the needs of contemporary hydration. With just a button press, you can quickly switch between hot and cold temperatures thanks to the ThermoSwitch's state-of-the-art technology. No more waiting for your drinks to get to the right temperature or carrying around several containers.

ThermoSwitch puts efficiency and safety above convenience. There is no need for tangled wires thanks to its handy magnetic charging stand. ThermoSwitch only needs to be placed on the charging station like a smartphone to start charging. Anytime, anywhere, you can enjoy your favourite drinks at the ideal temperature with the ThermoSwitch. With unmatched ease and usefulness, our product not only saves you time and effort but also improves your entire drinking experience. For people looking for a more modern and efficient way of living, ThermoSwitch is the best option.

ThermoSwitch hopes that its cutting-edge dual-temperature tumblers will become a worldwide sensation in the future. In addition to diversifying its product range with complementing items like insulated food containers and travel mugs, the company intends to investigate business-to-business (B2B) potential and enter foreign markets. Enhancing temperature control, extending battery life and charging options, and investigating clever gadget integration will be the main areas of technological growth. Carbon offset schemes, circular economy principles, and environmentally friendly products will be given top priority in sustainability activities. ThermoSwitch wants to become a market leader in revolutionary drinkware by enhancing its web presence, interacting with influencers, and cultivating a loyal client base. It will do this by consistently innovating and adapting to stay ahead of the curve.

## **1.2 PURPOSE OF BUSINESS PLAN**

There are several important functions that the ThermoSwitch business strategy fulfills. Its main goal is to raise money by luring investors and securing loans. It will serve as a strategic roadmap, directing daily operations and coordinating all endeavors with the overarching objectives of the business. Additionally, by conducting in-depth market research and risk assessment, the strategy will play a key role in assessing market potential. Additionally, it will be an effective tool for communication, bringing teams together internally and sharing the organization's vision with stakeholders outside the company. Lastly, the business plan will make it possible to track developments over time and make the required modifications to guarantee the company's long-term prosperity and steady expansion.
