EXECUTIVE SUMMARY

The internship was carried out in Port Klang at Wistron Technology (Malaysia) Sdn bhd. The internship ran for 24 weeks, starting on 1st March and ending on 9th August. Under the supervision of Mr David Lee, I have been assigned to the Learning and Development Department under Human Resource Management. Enhancing team members' knowledge, ability and competences in a variety fields is the aim of our department.

During my 24-week internship at Wistron Technology (Malaysia) Sdn Bhd, I oversaw a variety of human resource task to being involve in learning and development process, industrial relation process and recruitment process. Along with supporting several events such as Hari Raya Aidilfitri, I also collaborated closely with team members.

Overall, my internship experience at Wistron Technology (Malaysia) Sdn Bhd provided a tremendous platform for personal and professional growth. Engaging projects and tasks have taught me so much, especially when it comes to actively participating in various section of Human Resource. In addition, to strengthening my academic knowledge, my internship experience have piqued my interest in the workplace and strengthened my will to seek a profession.

ABOUT WISTRON

One of the biggest providers of communications and information products worldwide, Wistron specialises in producing contract goods for customer brands. Our areas of expertise include product design research and original design manufacturing (ODM) services for the top 10 ICT brands in the world. The primary focus of Wistron Malaysia is the production of electronic appliances, such as industrial handheld devices, smart speakers, smart audio devices, and smart home devices. The business engages in a number of manufacturing process phases, from assembly to quality assurance. Furthermore, Wistron Malaysia trades computer hardware and accessories with 65,000 workers working for Wistron Global globally. There are roughly 2,600 employees in Malaysia.

In Malaysia, the main manufacturing is the production of electrical appliances. This covers a broad variety of goods, including industrial handheld devices, smart speakers, smart audio devices, and smart home devices. trading accessories and hardware for computers. The business is engaged in the purchase and sale of computer parts and accessories. The establishment of Wistron in Malaysia has improved the economic situation in that nation. The company has generated income and jobs by providing employment opportunities for the local labour force. Moreover, the existence of Wistron has stimulated technological developments in the electronics sector, strengthening Malaysia's standing as a regional centre for manufacturing. Wistron has also aided in the development and expansion of the nation's economy by drawing in foreign investment.
