## Collaborative Teaching for DPF40043 and FIN242 Subjects: A Joint Learning Initiative

Author: Norazimah Mejri

On May 14, 2024, and June 21, 2024, Universiti Teknologi MARA (UiTM) Mukah Campus and Politeknik METRo Betong Sarawak collaborated to provide guidance to finance students from both institutions. The collaborative teaching program focuses on two core subjects: DPF40043 (Politeknik) and FIN242 (UiTM).

Collaborative Teaching Poster

This collaborative teaching allows students to engage with lecturers from different institutions and foster a sense of community. The lecturers involved in this project shared their expertise and knowledge, providing students with a comprehensive understanding of finance concepts. The virtual classroom setting enabled students to participate in discussions and ask questions.

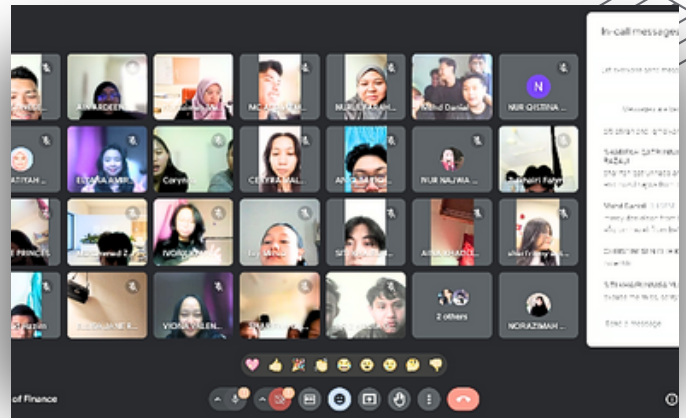

Photo session with students

As the finance sector evolves, it is crucial for educational institutions to stay ahead of the curve by adopting innovative and collaborative approaches to teaching. By sharing resources and expertise, the lecturers aimed to equip students with the necessary skills to navigate the dynamic finance industry. This joint initiative not only promoted knowledge sharing but also encouraged students to develop critical thinking and problem-solving skills. The success of this collaborative teaching program demonstrates the potential for online learning to transcend institutional boundaries.

Through collaboration, educational institutions are able to provide students with a more comprehensive and engaging learning experience and help students in achieving their learning outcomes.
