

Jom Sains Farmasi 2024:

Igniting young minds into the world of pharmacy

Professor Dr. Mizaton Hazizul Hassan

The Faculty of Pharmacy at UiTM is proud to have hosted the vibrant and exciting Jom Sains Farmasi 2024 (JSF 2024) since its inception in 2016, and the event has since grown into a cornerstone of STEM (Science, Technology, Engineering and

Mathematics) education and community involvement for the Faculty of Pharmacy, UiTM. It was another fantastic year for the program, which celebrated STEM by bringing together fresh perspectives and the faculty, from the undergraduates to the academics.

Participating in JSF 2024's engaging activities was a great way to get your hands dirty and ignite a passion for science, especially pharmacy. Attracting children as young as six, the event catered to preadolescence, laying the groundwork for scientific curiosity from the very start. In an inspiring and supportive setting, participants could explore various scientific concepts, conduct experiments, and role-play as junior pharmacists.

Among the many great features of JSF 2024 is the series of imaginative activities designed to improve participants' soft skills. These activities were designed to be engaging and educational, ensuring participants have fun and gain valuable skills. The faculty has consistently strived to make STEM education engaging and accessible for all students, and the program's success is a testament to their dedication and hard work. JSF 2024's success is entirely due to the staff's relentless pursuit of perfection and genuine desire to make a positive difference in the lives of participants.

Parents believe that the activities provided are fascinating and interactive and positively affect their children's enthusiasm for learning. Almost every parent intends to send their children to the program next year, and the children are excited to return next year, too.

Reflecting on 2016–2024, JSF has become a beacon of information and motivation. It has benefited the community and encouraged a passion for science for the children. With unwavering dedication and enthusiasm, JSF will strive to make an even more significant impact in the years to come, revolutionising STEM education and community engagement.
