Contents

1. Letter of Report Submission iv

PROJECT TEAM MEMBERS iii

2. Letter of Offer (Research Grant)..... iv

3. Acknowledgements v

4. Enhanced Research Title and Objectives vi

5. Report 1

5.1 Proposed Executive Summary 1

5.2 Enhanced Executive Summary 2

5.3 Introduction 3

5.3.1 Research Background 3

5.4 Brief Literature Review 5

5.4.1 Transformational Learning Theory..... 5

5.4.2 Technology Acceptance Model 7

5.5 Methodology..... 8

5.5.1 Research Paradigm 8

5.5.2 Research Approach..... 8

5.5.3 Strategy of Inquiry..... 8

5.5.4 Research Method..... 8

5.5.5 Research Model..... 9

5.5.6 Population and Sampling Method 11

5.5.6.1 Sampling 11

5.5.7 Instrument 11

5.6 Results and Discussion..... 13

5.6.1 Factors Influencing Adoption of Blended e-learning 15

5.6.1.1 Reliability Test..... 15

5.6.2. Summary of Findings 16

5.6.2.1 Factors Influencing the Adoption of Blended e-learning 16

5.6.2.2 Role of Technology Readiness in Adoption of Blended e-learning 16

5.6.2.3 Profiling Blended e-learning adopters 17

5.6.2.4 Framework for Blended e-leaning Adoption..... 17

5.7 Conclusion and Recommendation..... 18

Factors Influencing the Adoption of Blended e-learning 18

Role of technology readiness in adoption of blended e-learning..... 19

Future Recommendations of the Research..... 19

5.8 References/Bibliography 21

6. Research Outcomes 25

3. Acknowledgements

Highest appreciation and millions of thank you to all who are involved directly and indirectly to the completion of this research.

They are:

Prof. Dr. Hjh. Zainab Abu Bakar
(Dean Faculty of Computer and Mathematical Sciences)

Assoc. Prof. Dr. Isahak Kassim
(Deputy Dean Research and Industrial Linkages)
Faculty of Computer and Mathematical Sciences)

Research Management Institute (RMI) Universiti Teknologi MARA

and

To all who have given their co-operation and support throughout this research.

4. Enhanced Research Title and Objectives

Original Title as Proposed:

The Adoption of Blended E-Learning Among Malaysian Academicians

Improved/Enhanced Title:

Adoption of Blended E-Learning Among Malaysian Academicians

Original Objectives as Proposed:

- i. To identify the current state of blended e-learning among Malaysian academicians.
- ii. To investigate the factors that influence blended e-learning adoption among Malaysian academician.

Improved/Enhanced Objectives:

- i. To identify factors which influence the adoption of blended e-learning.
- ii. To investigate the role of technology readiness in the adoption of blended e-learning.
- iii. To profile the blended e-learning adopter.
- iv. To develop a framework for blended e-learning adoption.

5.3 Introduction

The rapid growth of internet technologies creates a broader teaching and learning environment. Consequently, blended e-learning has been advocated and is considered as the most promising pedagogical approach that combines the use of electronic learning tools with traditional face-to-face classroom instruction component to maximize teaching effectiveness (Ng & Tsoi, 2008). Many universities are adopting blended e-learning since it offers human contact (Han & Jung, 2008). Prasanna Ramakrisnan, Yuraidza Yahya, Mohd Nor Hajar Hasrol & Azlan Abdul Aziz (2009) stated that blended learning could help students to learn and help them to understand better in class. Many researchers believe that blended e-learning not only offers more choices but it is also more effective (Ng & Tsoi, 2008; Dziuban, Hartman & Moskal, 2004; Franklin & Harmelen, 2007; Lee & Chan, 2007).

Observation by Agboola (2005), the implementation of e-learning tools has not kept pace with advances in technology. Most academic institutions seem not yet ready to deliver interactive online instruction, and as a result, the adoption of e-learning has been very slow, as well as blended e-learning. Studies have shown that academicians are apparently apprehensive about teaching in blended e-learning (Brooks, 2008). According to Russel (2008), academicians in traditional campus universities are apparently reluctant to adopt e-learning innovation in their teaching practice.

5.3.1 Research Background

The introduction and contribution of computer technology in the educational sector has led to the emergence and development of a new environment for teaching and learning as exemplified in the form of computer-based learning (CBL), distance learning, online learning, e-learning and most recently blended e-learning.

E-learning is fast becoming a major and learning skills delivery method within learning institutions. Surveys show that among American colleges and universities in 2002, 11% of students took an online course, 97% of public institutions offered at least
