**DECEMBER 2019**

It is recommended that the report of this practical training provided

by

**MUHAMMAD AZIM AZHARI BIN ZILKAMA**

**2017206428**

**Installation Pre-Fabricated Cold Formed Steel Roof Trusses**

be accepted in partial fulfillment of the requirement for obtaining the Diploma In Building.

Report Supervisor : En. Anas Zafiroi Bin Abdullah Halim

Practical Training Coordinator : En. Muhammad Naim Bin Mahyuddin

Programme Coordinator : Dr. Dzulkarnaen Bin Ismail

## **ABSTRACT**

Roof is the covering of the top of a building that serving to protect against rain, snow, sunlight, wind and extremes weather. Roof trusses is structural of framework that typically consists of rafter, struts, battens and so on to support roof. The purpose of this report is about the types of roof that suitable for residential building. Besides that, the main objective of this report to learn the installation method for roof trusses. This building used a lightweight roof truss to complete the installation roof. For homes, vehicles, machinery, home and office furniture, utility poles, storage shelves, grain bins, highway products, drainage facilities and bridges, cold-formed steel is commonly used. Its popularity can be attributed to ease of mass production and prefabrication, uniform quality, lightweight designs, transport and handling economies, and quick and easy installation or erection. At the end of the report, we will learn the installation pre-fabricated cold formed trusses.

## ACKNOWLEDGEMENT

Alhamdulillah, praise to Allah, the Most Merciful, the Most Graceful.

In preparation of my assignment, I had to take the help and guidance of some respected persons, who deserve my deepest gratitude. As the completion of this assignment gave me much pleasure, I would like to show my gratitude En. Anas Zafiro bin Abdullah Halim, Report Supervisor, on UiTM Seri Iskandar for giving me a good guideline for assignment throughout numerous consultations. I would also like to expand my gratitude to all those who have directly and indirectly guided me in writing this assignment.

The aim of this internship is to be familiar to the practical aspect and uses of theoretical knowledge and clarifying the career goals, so I have successfully completed the internship and compiled this report as the summary and the conclusion that have drawn from the internship experience.

I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. A special gratitude I give to our, En. Muhammad Naim Bin Mahyuddin whose contribution in stimulating suggestions and encouragement, helped me to coordinate my project especially in writing this report. I would also like to thank ALL the UiTM lecturers that have taught and nurtured me in becoming a better student and person. I would also like to extend my deepest appreciation to the lecturers who are directly involved during my training stint.

Last but not least, my special thanks to my beloved parents for their sacrifices over the years.

Thank you so much.
