## ACKNOWLEDGEMENT

*In the name of Allah, the Most Compassionate, the Most Merciful*

Praise be to Allah the Al-Mighty for giving me the strength and patience to complete this study within the period given.

I wish to express my sincere gratitude to my advisor, Madam Rohaiza Kamis, for his continuous encouragement, invaluable suggestions, patient guidance and supporting me with kindness, sympathy and academic enthusiasm. His forceful comments and meticulous directions were a constant source of inspiration to my research that immensely improved the quality of this project paper.

I also would like to take this opportunity to deliver my deepest indebtedness to my parents for their patience, support and guidance for this research. Furthermore, great appreciation goes to the rest of my friends that help me from time to time during the research. The whole research really brought us together to appreciate the true value of friendship and respect of each other.

Great deals appreciated go to the contribution of my faculty - Faculty of Business Management (Finance). Apart from that, I hope that all the information and data that I have gathered here will increase the knowledge of anyone who will be accessing it regarding the study on the “The Relationship Between Profitability and Share Price of Banking Industry in Malaysia”. It would be a great honor to us if it is used as a reference or for any other good cause.

Finally, I would like to extend this appreciation to all that have directly and indirectly contributed invaluable assistance, cooperation and support in the completion of this research.

## **ABSTRACT**

The aim of this study is to investigate the relationship between Share Price with internal factor as a independent variables that would be affect to the dependent variables. The researchers has investigated how those of the variables would affect on the share price specially in Malaysian market by using yearly basis data from year 2000 to 2014. There have four variables that have been taken to be as independent variables of this study. The name of the chosen variables is return on asset, return on equity, earning per share and last is book value per share. The researcher interested study in the relationship between profitability and share price volatility mostly used tools to indicate the change trends in the market place.
