## **ACKNOWLEDGEMENT**

Alhamdulillah, first and foremost, I would like to express my deepest gratitude with the grace and blessings of the Almighty ALLAH S.W.T, I manage to complete this challenging research. Then, I am highly indebted to my advisor, Miss Nurul Ezaili Binti Alias, for her guidance, continuous support, remarks and direction throughout the period of the research study. Not only that, I am grateful on the time that she had spent with me for the consultation session even though having other commitments that she had to conjure into. With her encouragement and words of wisdom, the research study had been smooth because I am able to understand thoroughly on the research topic and the proper way to conduct the research.

Other than that, I also like to take this opportunity to extend my appreciation to all those involved in the completion of this research paper especially to my beloved family and my friend for their endless support that inevitably helped me to complete this research. With encouragement, understanding and help from anyone of my colleagues and families, I would not have been able to get where I have right now.

Last but not least, thank you very much too all the respondents who are employees in MiCoST in giving me the best cooperation while I'm conducting this research. Their feedback's and support are invaluable to me.

## **ABSTRACT**

This study seeks to examine factor that can influence on job performance. This study focuses on several factors that can influence job performance which are self-awareness, self-management, social awareness and relationship management in MiCoST, Melaka.

The sampling technique that was used in this study is proportionate stratified random sampling and the data collection was used is self-administered questionnaire. The researcher have distribute 82 questionnaires to 102 of the respondents. The data that had been collected was then evaluated by using Statistical Package for the Social Science (SPSS) Software version 22. Then, using SPSS test that were converged such as reliability analysis, frequency analysis, descriptive analysis, Pearson's correlation analysis and multiple regression. The results indicated from the impact which includes self-awareness, self-management, social awareness and relationship management on job performance. The findings of the study revealed that all independent variables which is emotional intelligence were found to have significant relationships with dependent variable which is job performance. However, based on the result it had been found that there are other independent variable that can influence job performance which is not included in this study.

***KEYWORDS:*** *Job performance, Self-awareness, Self-management, Social awareness, Relationship Management.*
