ABSTRACT:

HAPS is one of the mobile applications which could help all library patrons including the person with differently-abled to reach out the library resources. It is not only used to charging and discharging books, but also to assist the patrons (especially for slow learners) to develop their interest enjoying fun learning atmosphere. We do focuses on providing improved circulation services for charging and discharging items and hence, this application is the most suitable able to be provided as one of the guidance services for the library patrons.

Keyword: Mobile application, Library technology, Differently-abled person.

Novelty & Uniqueness:

The users whom intentionally download the application will be guided to reach the book without going to the physical building of the library. Literally, this application is creating to help the patrons to retrieve books, and thus, there are some features bring into “HAPS” application to cater patrons with differently-abled. The application is improvised to help patrons with differently-abled to develop their levels of knowledge while increasing the interest in reading.

Potential Commercialization:

- Lecturers
 - Students
 - Staffs
-

Acknowledgement:

Special thanks to the teachers and students from SMPKV Merbok for their participation and feedback towards the HAPS project.
