### Abstract

This flipping table can be used as a table and if needed it has desktop on the back of the table that can use by the users. We only need to add the desktop or the tablet at the back of the table and the desktop can be store if users only want to use the table. Besides, users don't need to bring their laptop everywhere because the existence of this table can save their day especially for the workers in the office. For the battery, the plug will be at the back of the chair behind the users with the charger as same as another laptop and computer.

### Why Flipping Table With Desktop?

- If users want to use the desktop with the table, they need proper space to make them feel comfortable because the desktop table is only for the keyboard.
- Users need to bring their laptop or portable personal computer everywhere and this will make them feel trouble when they are at the outside.
- Project called 'Flipping table with Desktop' suitable for all users and consumers in the library or at the office.
- This project is affordable and reasonable to the users as it will make their life easier to complete their work every day.

### Novelty and uniqueness:

- Can save space because it can keep the table under the desktop.
- Make users feel easier and don't need to bring their laptop because the table already has the desktop.
- Easier to search something in a wide perspection on the desktop.
- The desktop is touchscreen keypad so it can save some space and don't need to use the mouse and the keyboard like the other computers.

**Keyword:** Flipping table, and Multifunction table

**Potential commercialization:** Targeted to staff works at workstation, students, and in any institution that deals with the office management tools.

**Acknowledgment:** *Special thanks to HEA because of TAPA fund provision.*
