ACKNOWLEDGEMENT

First and foremost, we are grateful to Allah SWT for giving us the well-being and direction required to complete this report. In the end, we completed the report that our instructors, DR. AN NISHA NUR WELLIANA BINTI ABD RASED, given us in the specified time.

We would like to take this opportunity to thank our esteemed instructors, DR AN NISHA NUR WELLIANA BINTI ABD RASED, for her support, tolerance, understanding, and most significantly, for giving us the encouragement and warmth we needed to finish this report. She covered every step of how to finish this report in excellent detail. Having her as our lecturer has been a joy and an honour.

Not to add our profound appreciation to our parents for their unfailing encouragement and support in helping us finish this report perfectly. In addition, we would like to express our gratitude to my groupmate, with whom I worked closely to finish this report. We hope to learn a great deal from this second project, particularly in the area of building management. We also get fresh details and information regarding the Project. We also anticipate using this initiative to help us when we start our careers as building surveyors.

Ultimately, we hope that our report is finished and that it will be a valuable resource for us. Additionally, it will improve our comprehension of what we have studied. Many thanks for it.
