GSI User Board Meeting, 5 February 2020, 1130-1330 @ Wisma FMM

By: Prof. Dr Irwin Ooi Ui Joo

GSI is famous for being the non-profit organisation that invented the use of bar codes and for its push for harmonisation of trade facilitation policies and practices around the world. Its Use Board is a combination of two bodies, one is from the Pharmaceutical Working Group, and the other one is from the Supply Chain Excellence Working Group. Prof. Dr. Irwin Ooi has been a part of the latter Working Group for almost a decade. On 5 February, the joint body met to discuss various issues relating to supply chains that Malaysian companies have to work with. The group also provides a platform for sharing of information, expertise and best practices among members of the industry. Prof. Dr. Ooi's role in the group is to provide legal advice and updates in supply chain, international trade, trade facilitation and logistics matters.

Visiting Scholar Programme at PennLaw

By: Dr Nadzriah Ahmad

Dr. Nadzriah Ahmad of UiTMLaw has been selected as the award recipient of the Fulbright Scholarship for 2020/2021 by the J. William Foreign Fulbright Scholarship Board, Washington DC.

As a Visiting Scholar at the University of Pennsylvania Law School (PennLaw), Dr. Nadzriah will undertake research work relevant to re-entry and rehabilitation programmes for juvenile offenders. At PennLaw, Professor Regina Austin will serve as her faculty sponsor and the school is very much looking forward to supporting her research on the restorative justice model for juveniles that would strengthen the existing legal framework governing the re-entry and rehabilitation programmes in Malaysia.

PennLaw is one of the top five Ivy League law schools in the US. At PennLaw, Dr. Nadzriah, along with other visiting scholars and researchers, will be given opportunities to present her research as part of the workshop series. Her research would contribute to the betterment of the legal framework and policies governing the juvenile justice system in Malaysia. Dr. Nadzriah hopes that these valuable opportunities given to her will help to develop industrial linkages and open more doors for research collaboration between UiTM and the University of Pennsylvania. Additionally, Dr. Nadzriah hopes that her research work on juveniles can further contribute to the stakeholders in Malaysia, particularly the Social Welfare Department and the Ministry of Women, Family and Community Development, so that the legal rights of children in the criminal justice system would be better protected.
