UiTM STRENGTHENS AI ECOSYSTEM THROUGH STRATEGIC PARTNERSHIP WITH SDS AI LAB

We're excited to announce the signing of an MoU between Universiti Teknologi MARA (UiTM) and SDS AI Lab Sdn. Bhd. This partnership, which started with discussions in 2023, aims to enhance digitalization efforts and AI training at UiTM. We're looking forward to the establishment of the Special Interest Group (SIG) AI Nexus, which will foster greater collaboration and innovation. The MoU will boost academic collaboration, facilitate student and faculty exchanges, and support joint AI research initiatives. Our students will gain hands-on experience and formal education in AI, giving them a competitive edge in the global job market. This partnership also paves the way for joint conferences, workshops, and academic events, promoting continuous knowledge sharing and AI expansion. Thank you to SDS AI Lab Sdn. Bhd. for partnering with UiTM and AAGBS. We look forward to a successful collaboration that will elevate both institutions.
