ACKNOWLEDGEMENT

Assalamualaikum w.b.t...

First of all I would be grateful and thankful to God for giving me the opportunity and strength to me to complete my Individual Thesis for Research Paper in Business Administration (Human Resource Management) subject.

Highest appreciation to my advisor of Sir Ramesh was constantly providing guidance and guided me in completing my thesis. Without the help and assistance from him it might be hard for me to complete my thesis. In addition, I want to thank to the Miss Suraya Hamimi as my second examiner for my thesis and presentation

Furthermore, I would like to my family for their nonstop supporting me until I complete this research study. Thanks to them also because always help me by giving financial support to me for every expenses that I used in my research study.

I would like to acknowledge my appreciation to all staff at Holcim (Malaysia) Sdn Bhd for their co-operations and assistance in answering my questions survey for my research

Last but not least, thanks to all my friends those assist me directly or indirectly in my research paper. Without their help and support it might be difficult for me to complete the task.

ABSTRACT

The report is about the study on the relationship between Information Technology Acceptance with Employees' Task Performance at Holcim (Malaysia) Sdn Bhd. This report is created by refer the result that I got from surveys of giving out from questionnaire to the staffs in the Holcim (Malaysia) Sdn Bhd at City Square (Corporate Office) and Pasir Gudang Plant as my respondents in this research. The questionnaire was distributed to 100 respondents which are registered employee at Holcim (Malaysia) Sdn Bhd in order to get useful information and accurate data regarding the relationship between Information Technology Acceptance with Employees' Task Performance. This study found that there is no relationship between perceived ease of use with the employees' task performance. Secondly, the researcher found that the quality of information technology have a relationship with the employees task performance. The researcher suggests to improve and increase the training program for employees because the information technology changes will influence the employees' task performance to become poor. Besides that, researcher also suggest the company should always updating the quality of information technology because the good quality of the information technology give a good impact for employees and directly improve the company performance.

Keyword: Information Technology Acceptance, Task Performance, Perceived Ease of use, Quality,.
