PENGURUSAN *NICHE COLLECTION*

PERPUSTAKAAN UiTM.

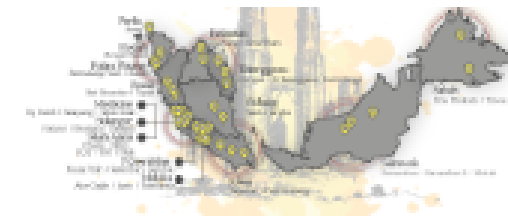

10 Mac 2026
20 Ramadan 1447
Selasa

Masa
9.00 pagi - 11.30 pagi

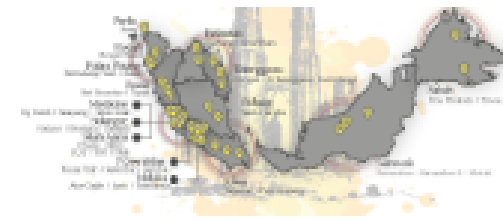

Lokasi
Google Meet

TENTATIF PROGRAM

Masa	Tentatif
9.00 pagi	Sesi 1: Garis Panduan Pembangunan Koleksi Bahan Niche Perpustakaan UiTM Penceramah: Abdul Razak bin Abdul Rahman (Timbalan Ketua Pustakawan (M) (KUP))
10.00 pagi	Sesi 2: Penetapan Metadata Bahan <i>Niche Collection</i> Penceramah: Nurul Atika binti Harud Din (Pustakawan)
11.00 pagi	Sesi Soal Jawab
11.30 pagi	Tamat

OBJEKTIF PROGRAM

01

Memberi kefahaman menyeluruh kepada pegawai mengenai prosedur pengurusan *Niche Collection* dalam repositori

02

Membolehkan pegawai melaksanakan proses deposit bahan dalam repositori dengan betul mengikut panduan dan standard yang ditetapkan

03

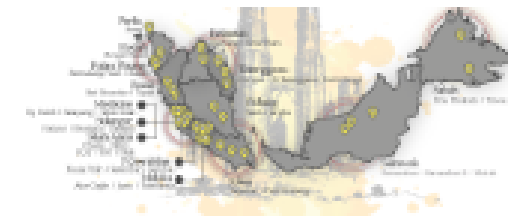

Memastikan ketepatan dan konsistensi metadata semasa proses deposit bahan bagi menjamin kualiti maklumat dalam repositori

04

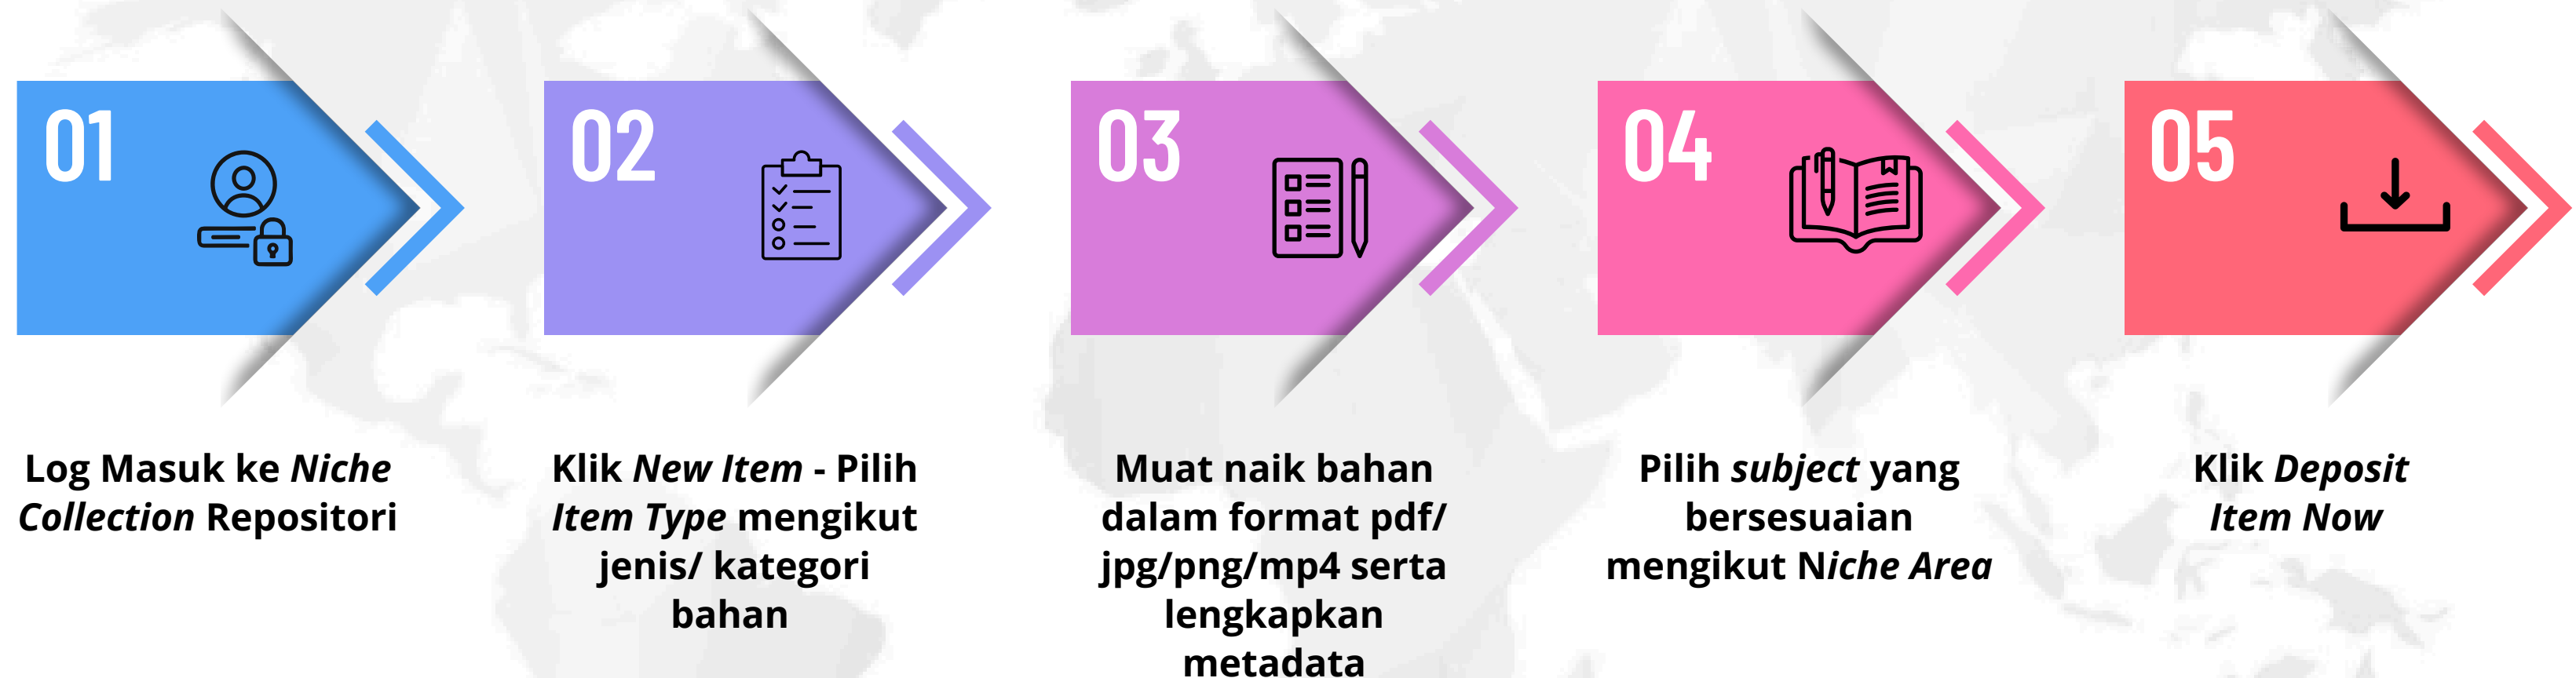

Memperkasa penggunaan repositori melalui pemahaman fungsi-fungsi utama bagi pengurusan koleksi yang lebih efisien.

05

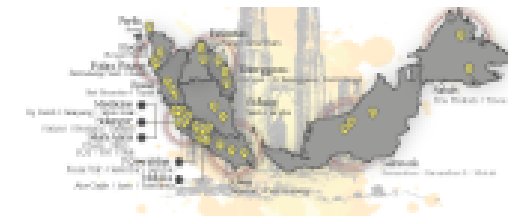

Meningkatkan tahap pematuhan pegawai terhadap garis panduan dan ketetapan dalam pengurusan *Niche Collection*.

★ Title

Malaysian artist sees batik and storytelling as a canvas for culture

Huruf besar hanya digunakan untuk perkataan pertama dan kata nama khas

★ Abstract

where every motif holds a story waiting to be read. At 48, Arif approaches each design with intention: no pattern is random, and no symbol is merely decorative. His motifs open pathways into layered histories, local customs, and the lived experiences of the communities he portrays. Under his moniker Superdoofus, he has carved a distinct identity in Malaysian art, using batik patterns to celebrate unity through diversity. Each artwork becomes a tapestry of cultures, with motifs echoing the country's many ethnic roots stitched together into a shared visual language.

Abstract

The coconut plant act as an essential role in the economy of many Asian countries including the Philippines and their economies are recently threatened due to a serious outbreak of the coconut leaf beetle, *Brontispa longissima* (Gestro). This study was conducted to record the number of populations of *Brontispa longissima* (Gestro) and their interactions with three different locations, the variety of coconut plants and the weather for 12 months. Coconut leaf beetle [*Brontispa longissima* (Gestro)] infestations was observed in the field on different varieties of coconut palms such as the hybrid, Matag, the aromatic dwarf (locally known as pandan) and the exotic Tagnanan Tall in three locations viz., Parit Botak, Johor, Pasir Mas, Kelantan and Hilir Perak, Perak. Observations on infestations were recorded for one year from January to December 2016. Sampling was conducted based on the symptoms of coconut leaf damage by the *B. longissima* on the coconut trees. A total of 50 to 100 trees of each variety were chosen at random for data collection. Leaves of each frond were examined for the number of larvae and adults of *B. longissima*. Data was recorded once a month for a period of one year. Data were transformed using the square root of $x (\sqrt{x})$ for normalisation before analysing using a 3-WAY ANOVA to determine the effect of months, varieties and stages of *B. longissima* on the extent of coconut leaves damaged. The mean number of coconut beetles was higher and varied significantly ($P < 0.05$) on the aromatic pandan variety compared to other varieties. The mean number of *B. longissima* larvae was found in larger numbers compared to their adults. Significant differences were seen in the mean number of *B. longissima* beetles recorded between months. Most beetle infestations were recorded in the middle and at the end of the year, i.e. between July and December 2016. The influence of weather changes on beetle populations is also discussed. We concluded that *B. longissima* is an economically important pest for the coconut palm industry in Malaysia.

Ahli akademik bimbang terhadap ChatGPT

Jason Thomas - February 1, 2023 2:48 PM

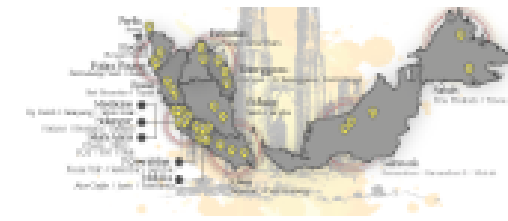

Seorang profesor di Wharton School University of Pennsylvania mendapati ChatGPT mendapat markah antara B- dan B dalam program Master Pengurusan Perniagaan.

PETALING JAYA: Berupaya menjana esei dalam masa sangat singkat, program kecerdasan buatan (AI), ChatGPT, kini menimbulkan kekusaran dalam kalangan ahli akademik dalam negara. Dilancar pada November, ChatGPT direka bentuk menyerupai perbualan seperti manusia. Namun, ketepatan dan maklum balas menyeluruh membuatkan ia seakan-akan penulisan hasil tangan manusia. Bulan lalu, profesor di Wharton School University of Pennsylvania mendapati ChatGPT berkemampuan memperoleh markah antara B- dan B bagi program Master Pengurusan Perniagaan (MBA).

Walaupun sukar menemui sebarang maklumat berhubung penggunaan program AI itu di Malaysia, sekolah awam di New York, baru-baru ini, menyekat akses ChatGPT dalam peranti sekolah dan jaringannya susulan "impak negatif terhadap pembelajaran pelajar dan kebimbangan keselamatan dan ketepatan kandungan". Semalam, pembuat program mengeluarkan aplikasi yang direka bentuk untuk mengenal pasti sama ada penulisan itu dihasilkan AI. Pengerusi Pergerakan Tenaga Akademik Malaysia (Gerak), Zaharom Nain, berkata walaupun seseorang tidak sepatutnya "terpesona, dibutakan atau terpedaya" dengan program seperti ChatGPT, sangat penting untuk tidak memandang remeh program seumpama itu.
