Abstract

Good news to all book worms and home lovers. We are having a new product made from our fresh herb or just pluck from your neighbourhood. The fresh herb are pandan, citronella, kaffir lime and so on. We have found a new creation of product known as 'aromatic herb essence'. The function of this product is to make our library pleasant and refreshing. Just spray or rinsed a few drops of the essences it will be able to emulate the area. It is also can act as insect repellent. It is because we use citronella. The cost of making this product is just around RM 6.00 and we are going to sell it at RM 7.00. Finally, it an amazing after all these obstacles we faced, all our friends, teachers administration or even our principal. Due to being able to produce this "a to z" them we feel a bid proud of ourselves to have this experience and to become the future scientist.

Novelty and Uniqueness:

In addition to eliminate musty smell it can prevent pests such as ants because we use citronella.

Keyword: Aromatic Perfume

Potential commercialization: This product is not using a lot of cost. This product IS able to be commercialize if full emphasizing on the product is taken.

Acknowledgment:

Appreciation to Muizzah Binti Mansor , Jehan Binti Mohd Idris and all the teachers who support us from the beginning until the end.
