MATRIC NO.	2012202152
SUPERVISOR	MR. MUHAMMAD SYUKRIE BIN HJ ABU TALIP
PERIOD OF INTERNSHIP	5 DECEMBER 2016 – 10 MAC 2017

ACKNOWLEDGEMENT

Most of all, I want to acknowledge and thank to Allah s.w.t with my deepest gratitude for the miracles He has performed in my life for the completion of this practical report. I am able to complete this assignment which facilitated the completion on this industrial training report. This Industrial training report would have not been carried successfully without the cooperation from many parties who contributes in preparing and completing this study.

My sincere thanks and gratitude are extended to my dedicated and understanding advisor Sir Muhamad Syukrie Bin Abu Talip, the lecturers of University Technology Mara Sarawak, Campus Mukah, for the guidance and assistance, understanding and commitment throughout the duration of this work. The encouragement, understanding, suggestion and criticisms were helpful in completing this practical report.

I am also deeply indebted with the Estate Manager, Mr, Golmie Bin Gani and all staffs at Tulai Estate for cooperation in providing materials and information for this practical report.

A special word of appreciation goes to all individuals and my friends who involved directly or indirectly in giving useful information and valuable comments for me in completing the practical report. Not to forget, I am grateful to have very understanding family member who always support my concern about my practical report. Here, I am honoured to state my family member and giving me courage.

Thank you very much once again for all people have been involved during the completing process in my practical report. The cooperation are kindly appreciative.

INTRODUCTION

Introduction Of Industrial Training

Industrial training is a prerequisite to the award of Diploma students In Planting Industry Management, University Technology Mara Sarawak, Campus Mukah. It is also designed to give exposure and experience to the students about the real situation in their respective fields and early preparation for students before they enter the working world. For sessions from June to November 2016, the training runs for 3 months starting 05 December 2016 until 10 March 2017. I was stationed at TULAI ESTATE SIBU-SARIKEI ROAD, SARAWAK

The Importance Of Industry Training

Training is a branch of knowledge that provides an opportunity for every student to apply the learning process experienced during a session in the classroom. It can be seen from different perspectives, for example, indirectly it can intensify existing skills found in a student's own self as well as gain new skills and knowledge in a particular field of work through.

In addition, industry training also reduces nervousness and feeling awkward when students face the real working world will realize the ambitions and dreams while studying. All the solutions of the problems the industry training will be a maturing experience for yourself. Indirectly, it will bring awareness to the students that the situation in the workplace actually is not as easy as they have learned in theory and practice while learning.

On the other hand, industrial training is important because it makes it easier for students to apply for suitable positions after graduation. This is no doubt because in general the firm emphasizes individuals with high knowledge and work experience. Therefore, it is possible that the company offers a place for former trainees after graduation.

However, the input obtained from this training is very large. Students can use the experience and skills acquired during the training period as a guide and supply in the future. In addition, the difficulty encountered during this period will be a key enabler and catalyst for students to improve the performance of a high extent and make sure the student become dedicated worker.

CONCLUSION

Greatest thanks to Tulai Estate for accepting my application to finish my industrial training. From this industrial training I can gain much knowledge that I never know before. In reality, I found that agricultural activity is more interesting when we start to involve in either in management or agriculture aspects. I hope Tulai Estate can provide more information and activities to other practical training toward oil Palm plantation in Malaysia.

The knowledge that I obtain will be guidelines for me in the future when I further my study or the world of occupation. I hope I can be a successful in career in the future especially in this agricultural activity. After finishing my industrial practical I will share my knowledge and experience to all people so they will know more about Tulai Estate. Once again, the greatest thanks to Tulai Estate for accepting me to do my training.

Finally, thanks to all individuals who involve directly or indirectly which have contributed and give cooperation during my industrial training. All of your effort will be highly appreciate by me.
