1. INTRODUCTION

Grateful to Allah S.W.T for His guidance bless and giving me a strength to finish my industrial training properly with the stipulated time frame and prepare my industrial training at the moment and further required by the our faculty.

Within 12 weeks, 12 December 2015 until 6 March 2016, I have run industrial training at Agriculture Training Centre,, Sungai Sebieu, 11TH ML Jalan Bintulu/Miri, 97000, Bintulu. During I do my industrial training at this center, I can learn many things that I do not knows before. I have through a new experience in my life, especially in the working environment. When I was in the agency, I can practice my skill that I have learn in UiTM and I learn a new things about fishery although before it never learn about it. Furthermore, I can learn a properer technique how to prepare a mix soil, how to apply the fertilizer at the large amount, how to prune the trees and many more.

The most important aspect for me when I am in industrial training is it can give a change for student like me to know about the real working environment. It can increase a student knowledge how to handle the agriculture activity. Furthermore, it can increase student confidence that we have.

Furthermore, industrial training is the best way to train the student like me about how to be friendly with staff and boss at the agency. During the industrial training, it give a change for me how to communicate with the staff with the best ways because it is he most important aspects in working environment. Indirectly, it can creating a more disciplined attitude, responsibility, make a decision how to make handle the problems that have come. Beside that, industrial training can fulfill the objectives to producing graduates with highest quality in mental and physical in working environment soon.

5.0 COCLUSION

In conclusion, I can say that this industrial training have successfully gave me new knowledge and experiences where I can used it for my future career undertakings. I am also able to apply my theoretical knowledge where I learned during university during this industrial training as well. Thus, it shows and proven the theoretical knowledge is true based on the training given.
