

Acknowledgement

First and foremost, thanks to God because of His Blessing, I managed to complete my industrial training at Craun Research Sdn. Bhd. I would like to express my thanks to University of Technology Mara (UiTM) for giving me this opportunity to gain some knowledge and experience in working environment to prepare myself for real working process.

Secondly, I want to dedicate my appreciation to Craun Reseach Sdn. Bhd. Sungai Talau Research Station for accepting me to have industrial training with their company.

Furthermore, I would like to dedicate my special thanks to Mr. Iswandi Bin Jamil, Station Manager of Sungai Talau Research Station which is also my supervisor for assist, giving useful advice and sharing information throughout this internship. Thank you also for guide and give me helpful advice in writing my final report of industrial training.

Not to forget, I would like to thanks all the staffs that have been assisted and guided me all the way during my training period. Biggest thanks given to Madam Zaiton Bohari and Madam Megawati Hamdan for helping me a lot during my period of industrial training.

I dedicate my sincere thanks to Madam Saiyidah Raffhanah Binti Basri, supervisor for internship programme in helping for my internship arrangement.

Last but not least, thankful to everyone who have been help and support me throughout this internship in order to complete my diploma level. I really appreciate it and may God bless all your kindness in future.

Introduction to Industrial Training

Industrial training is a part of academic subject required by faculty and need to be passed by students to complete their diploma. Student are required to undergone industrial training at any organization they choose either government or private sector. For a specific period of time, student will be face new experience and challenge throughout the training.

Several objectives of industrial training are:

- i. To expose student with real working environment.
- ii. To enhance student with new input, knowledge and experience.
- iii. To enhance soft skill and hard skill along with self-confidence needed by every student before step to working environment.
- iv. To provide opportunities in adding qualities and marketability to student for job application in future.
- v. To develop teamwork between students and worker as this will encourage student to have good relationship with coworker in future.

Conclusion

To conclude, industrial training has given much benefit to students. Through it, I have gained much experience in the working life that I will face in the future. Industrial training is one of the effective ways to teach student with skills by exposed them outside University campus to learn the new experience and knowledge. Lastly, I hope that this industrial training program will be carried on in future with longer period. So that, UiTM can enhance student to have good quality for certain job in future.
