## ACKNOWLEDGEMENT

Firstly, I would like to thank to the campus for giving this opportunity to me for letting me to have practical training at Stesen Pertanian Kabuloh. It is really a big experience for me. Thanks for helping me to apply to have a practical training at this place. I am very glad that I have spent about three months at Stesen Penyelidikan Pertanian Kabuloh. During that time, I learn a lot and also gaining new experience and learn to live in new environment.

Next, I would like to thank to Stesen Penyelidikan Pertanian Kabuloh for letting me to have practical training here. A lot of thanks to OIC Hajah Rosmah Hj Jaffar, for his guidance and support during practical time. Thanks for spend a lot of time to teach me about theory and also practically about the knowledge of every section. Besides that, I would like to thank to RO John Jadol for his assist and guidance during practical time, without his help, it would be hard for me to finish my training well done.

I am also deeply indebted to the supervisor, PT Lilianita, AA Muriani Harry, AAO Razaman Ibrahim, SAA Yusli Sawal, AA Pn. Sandra Faradilla, AA Desmond Rangub and SAA Agam Giang for cooperation in providing materials and information to me to complete this report. I learn a lot of experience during that time. Also, I would like to thank to all staff in the section for assist in giving me a valuable information and suggestion for me to complete this training report. Also I would like to thanks to all staff in Stesen Penyelidikan Pertanian Kabuloh which involved to taught me many of experience.

I would like to express my appreciation and thanks to Diploma in Planting Industry Management, Mr. Muhamad Syukrie Bin Abu Talip for giving me advices, guidelines and information during the process of completing this report. I would also like to thank to those whose have helped me to complete this report directly or indirectly.

Sincerely, thank you once again. It is must appreciate.

### STESEN PERTANIAN KABULOH BACKGROUND

Stesen Penyelidikan Pertanian Kabuloh was incorporated on 1964. The Stesen Pertanian Kabuloh has many sections, including fruits section, rubber section, herbs section, fields crop section, mixed crop section, and planting material section.

That also have a major role:

- i. Research,
- ii. Technology transfer ,
- iii. Advisory services to farmers ,
- iv. Provide training for training staff. About diseases or pest control , increased yield , and crop information .

### Conclusion

The three months of my industrial training had taught me that the real job life is far away different from students life. We have been exposed to a lot of things that we never being taught in class. The environments also differ. Communication is the most important thing as it will help us to reach that understanding between the members. The good relationships and bonding between the staffs and me make me feels like I'm home because of their warm welcome.

Next, the knowledge and experience that gained from this industrial training will be my guidance for my future either when pursue my study or the world of occupation. In hope, I wish I can learn and experience like this again as a knowledge. From this knowledge I can bring it to build and improve my career as a plantation student. Besides that, after done with this industrial training, I will share my new experience and information to all people, and they will know that Stesen Pertanian Kabuloh is the best place for industrial training. Once again, greatest thanks to Stesen Pertanian Kabuloh and all staff who helped finish my industrial training.

Finally, deeply thanks to all people who involved directly or indirectly which have contributed all information and cooperation during my industrial training. All of your effort and help will be highly appreciate by me. Dedicated planters in the making.
