ACKNOWLEDGEMENT

Alhamdulillah , I would like to express my gratitude to Universiti Teknologi Mara (UiTM) for giving me the opportunity and managing the process for me to undergo this industrial training. I would also like to express my thanks to my lecturers especially Mr. Muhammad Syukrie Bin Abu Talip for managing my application for undergoing industrial training and also providing me with guides during my industrial training program.

Highest appreciation and gratitude are given to Tabung Haji Plantations Ladang Sematan for accepting my application to undergo industrial training and also providing me with great hospitality during my stay. I would also like to acknowledge the guidance and help provided by the Manager , Assistant Managers , and also staffs of Tabung Haji Plantation Ladang Sematan in assisting me to complete my industrial training program.

Expression of gratitude are also given to my family and friends that helps me during my industrial training and completing my industrial training. Their moral support has been vital in order to keep me going strong in undergoing and completing this industrial training program.

Company Background

Tabung Haji Plantation (TH Plantation)

TH Plantations Berhad, the plantation arm of Lembaga Tabung Haji (**TH**) is engaged in the business of oil palm and rubber plantations in Malaysia.

It was first incorporated in 1972 as Perbadanan Ladang-Ladang Tabung Haji Sendirian Berhad with its first estate Ladang Sungai Mengah, measuring 4,054 hectares. Over the years, THP gradually expanded its land bank and to date, THP's land bank stands close to 105,000 hectares. With the acquisitions made in recent years, THP believes there is a vast potential for significantly higher FFB and CPO production in the coming years.

THP currently operates 36 oil palm estates in its stable spread throughout Malaysia as well as 4 rubber plantations in Sabah. It most recently acquired over 10,000 hectares of land in Kalimantan Timur, Indonesia, marking THP's own first foray overseas.

THP currently owns plantations and mills in the states of Johor, Pahang, Negeri Sembilan and Terengganu in Peninsular Malaysia, as well as the states of Sabah and Sarawak. THP has also recently acquired land bank in Kalimantan Timur and development work is actively progressing.

THP mainly produces Fresh Fruit Bunches (FFB), Palm Kernel (PK) and Crude Palm Oil (CPO) for the consumption of the Malaysian market. Apart from oil palm plantations, THP has also ventured into rubber plantations.

DISCUSSION / CONCLUSION

Industrial training program has taught me a lot of things in just the short period of 3 months undergoing the training. Through this industrial training , I have learned so much on course related matters whether in field or outside of field.

Firstly , industrial training has equipped me with so much knowledge on related matters especially on estate management work. These knowledge that I acquire from my industrial training increase my knowledge on my course related matter rather than just the knowledge I acquire from classes and notes. Through the combination of the knowledge I acquire in class and also the knowledge I acquire from my industrial training , I could understand better and get to know much more things to prepare myself for future challenges.

Secondly , the most vital success I achieved from the industrial training is that the program exposed me to the real working experience. The training program allows me to visualize and show me regarding the matters that I only learned through books and notes in the class which gives me a better understanding on the topic. Through this exposure , I am able to boost my confidence and make myself better prepared to work in the field in the future.

Overall , this industrial training program is successful. Every objective that I was meant to achieve before starting this training is already achieved all through this 3 months of industrial training. The implementation of industrial training program should be continued for students as it is a very effective method in making the student become better and more productive.
