## **ACKNOWLEDGEMENT**

Thanks be to God for His blessing and His guidance which enabled me to complete my industrial training, completing the writing of this report and will entitle me to receive my diploma.

On 30<sup>th</sup> of November 2015, I have started my industrial training at Pusat Latihan Pertanian Sg. Sebiew, Bintulu and ended on 06<sup>th</sup> of March 2016. I have learned a lot of things throughout the past 3 months. I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. A special gratitude I give to my precious parents who had support me in term of financial.

As for my lecturer so do called as my supervisor from Universiti Teknologi Mara (UiTM) Sarawak, En. Muhammad Syukrie bin Hj. Abu Talip, thank you for the knowledge and also guidance that you give during my training and also helping me by giving me some opinions in order to complete my industrial training report. Furthermore, I would also like to acknowledge with much appreciation the crucial role of the staff and the supervisor of Agriculture Training Centre(ATC) Sg. Sebiew Bintulu, Encik Awang Zainuddin who gave the permission to use all required equipment and necessary materials to complete the task of industrial training. A special thanks goes to my team mate, Elvika Sunta, Caroline, Rebecca and Aina Fatinah, who help me to assemble the parts and give suggestion during my industrial training.

Lastly, I have to appreciate and thanks for the guidance given by all of you. May God pours the blessing abundantly to all of you.

## INTRODUCTION

Agriculture training centre (ATC) is a place where the farmers or target people to get an information about agriculture sector. ATC also give hard effort to attract target people in involving themselves to agriculture sector. Agriculture Training Centre(ATC) as a guidance to improve skill and knowledge of farmers or target people of using new technologies in agriculture sector besides needs to expose the farmers or target people of different aspect in producing and marketing their production instead of improving their income. Agriculture Training Centre(ATC) also have a role helps in improving their confident that the agriculture sector can give high income to them.

Since we as trainee, ATC introduced four station where there a place to complete an attachment during a period of industrial training. There are fishery units, herbal units, landscape units and lastly is commodity units. In fishery units at agriculture training centre, we learned new thing because I have never learn or taught about fish during lecture before. The other thing we did in fishery units are weeding the plant, applying fertilizer to plant, and emptying the catfish's pond.

While at the herbal units, we asked by supervisor to planting new variety of herbs such as ketumbar jawa, bunga cina, pegaga, serai wangi, kemangi, pandan, mahkota dewa and peppermint/mint. Besides, we also have weeding all herbs in pot, filled polybag with mixed soil(CIRP, chicken manure), and gotong – royong cleaning up the nursery of herbal units.

At landscape units, the most things we had learn is filled polybag with soil. Then, we also have to do weeding at nursery. Before that, we told by supervisor about kind of flower where outdoor and indoor flower. Besides, we applying fertilizer to all flower or plant in landscape's nursery for their good growth.

Lastly, we finished our attachment at commodity units. We applied all technique that we have learned during lecture in class. For example, technique of pruning, harvesting, weeding, and applying fertilizer to plant or fruit tree. So, this experience are very valuable for me to learn and carry out when I face the real world of working in the future.

## **CONCLUSION**

During these 3 months working at agriculture training centre as a trainee, I am exposed to many new experiences which are very valuable for me to learn and carry out when I face the real world of working in the future. The reason for us as a student doing or having our industrial training is to expose us to the work life before we graduating soon. By doing so, we will know how to adapt and communicate with other people who are on the same field as we are or with those who will work as a team with us. The period that each student undergoes for an industrial training cannot be use as a measurement because what is gain and knowledge that we obtain during the training is the most important thing. Lastly, thank you again for the knowledge that they gave to me. To those who involve either directly or indirectly, your support are much appreciated. Thank you.
