PREPARED FOR:

ENCIK MUHD. SYUKRIE BIN HJ. ABU TALIP

ACKNOWLEDGEMENT

Thanks be to God for His blessing and His guidance which enabled me to complete my industrial training, completing the writing of this report and will entitle me to receive my diploma.

On 6th of June 2016, I have started my industrial training at Pusat Latihan Pertanian Sg. Sebiew, Bintulu and ended on 11st of September 2016. I have learned a lot of things throughout the past 3 months. I have several people to thank for helping me achieve this exceptional performance and extraordinary.

Firstly, I have a family, especially my father Mr. Jacob Anak Balajak to thank for providing emotional support and inspiration. He continued to encourage me to stay motivated and focused. Secondly, I have a mother Yah Anak Untol and my family to thank for their extraordinary patience, moral and financial support.

As for my lecturer so do called as my supervisor from Universiti Teknologi Mara (UITM) Sarawak, En. Muhammad Syukrie bin Hj. Abu Talip, thank you for the knowledge and also guidance that you give during my training and also helping me by giving me some opinions in order to complete my industrial training report.

In addition, I was really doing my practical training 3 months, I have been conducting. the supervisor of Agriculture Training Centre(ATC) Sg. Sebiew Bintulu, Encik Awang Zainuddin and all staffs of Agriculture Training Centre (ATC)Sg. Sebiew Bintulu support have helped me a lot thank you for doing good deeds to keep running on practical training and who gave the permission to use all required equipment and necessary materials to complete the task of industrial training.

Last but not a least, a special thanks goes to my team mate Joy Saran Saro, who help me to assemble the parts and give suggestion during my industrial training.

In short, for every person who has touched my life, and especially those involved in report misery ,I thank you. Thank you from heart policy because I can't do this without you. Thank very much. You are the best!

Thank you.

INTRODUCTION

Agriculture training Centre (ATC) is a place where the farmers or target people to get an information about agriculture sector. ATC also give hard effort to attract target people in involving themselves to agriculture sector. Agriculture Training Centre(ATC) as a guidance to improve skill and knowledge of farmers or target people of using new technologies in agriculture sector besides needs to expose the farmers or target people of different aspect in producing and marketing their production instead of improving their income. Agriculture Training Centre(ATC) also have a role helps in improving their confident that the agriculture sector can give high income to them.

Since we as trainee, ATC introduced four station where there a place to complete an attachment during a period of industrial training. There are herbal units, commodity units, landscape units and lastly is fishery units. In herbal units, we asked by supervisor to planting new variety of herbs such as ketumbar jawa, bunga cina, pegaga, serai wangi, kemangi, pandan, mahkota dewa and peppermint/mint. Besides, we also have weeding all herbs in pot, filled polybag with mixed soil(CIRP, chicken manure), pruning the herbs in pot, planting herbs in pot and polybags and gotong – royong cleaning up the nursery of herbal units.

While at the commodity units, we applied all technique that we have learned during lecture in class. For example, technique of pruning, weeding, and applying fertilizer to plant or fruit tree. We also transplanting mangos on the polybags and gotong-royong cleaning up the nursery of commodity units.

At landscape units, the most things we had learn is filled polybag with soil. Then, we also have to do weeding at nursery. Besides, cutting the ixora and bougainvillea. Then, planted on the polybag which using the young shoot to make grow faster.

In fishery units at Agriculture Training Centre, we learned new thing because I have never learn or taught about fish during lecture before. The other thing we did in fishery units are weeding the plant, feeding the fish, pond preparation and transferring the fish fries to the nursery pond.

Lastly, we also attending some of course that the ATC had organized. On 16 – 17 of august 2016 we had attend fisheries short term course, on 18 of august 2016 we also attending the bakery course and on 8 of September 2016 we attend our last course that lecture by MPOB about the technologies of planting oil palm.

CONCLUSION

The internship exercise during these 3 months working at agriculture training centre as a trainee was mainly to enable me acquire practical skills and link theory to practice in the real world. I am exposed to many new experiences which are very valuable for me to learn. The reason for us as a student doing or having our industrial training is to expose us to gained the experienced and knowledge that can be used for suitable job without delay after studies. By doing so, we will know how to adapt and communicate with other people who are on the same field as we are or with those who will work as a team with us. The period that each student undergoes for an industrial training cannot be use as a measurement because what is gain and knowledge that we obtain during the training is the most important thing. However, training has proved to be satisfactory. It has allowed us an opportunity to get an exposure of the practical implementation of theoretical fundamentals. Lastly, thank you again for the knowledge that they gave to me. To those who involve either directly or indirectly, your support are much appreciated. Thank you.
