ACKNOWLEDGEMENT

Thanks to God for His blessing and His guidance which enabled me to complete my industrial training, completing the writing of this report and will entitle me to receive my diploma. A big thanks to God because always give me His blessing on my long journey in this world.

On 30th of November 2015, I have started my industrial training at Stesen Penyelidikan Pertanian Kabuloh, Miri and ended on 6th of March 2016. I have learned a lot of things throughout the past 3 months. There are many new experiences that I get from this industrial training. I would like to give my thanks to the most precious person in my life, which is my parent, Mr. Chupong Anak Braoh and Mdm Imbau Anak Lanchang for their endless moral support and also in terms of financial support. They always support me in whatever I do. To my internship friends, thank you for your suggestion, and ideas throughout the training. That was a great memory able to work with you all.

As for my lecturer so do called as my supervisor from Universiti Teknologi Mara (UiTM) Sarawak, En. Muhammad Syukrie bin Hj. Abu Talip, thank you for the knowledge and also guidance that you give during my training and also helping me by giving me some opinions in order to complete my industrial training report. Thanks again because share this valuable experience which is able to give me a great experience for my future reference. Last but not least, to all staff at Stesen Penyelidikan Kabuloh OIC Hajah Rosmah Bt Haji Jafar, RO John Jadol, RO Patricia Rachel Roney and other staff that I enable to mention here thank you because give me this great opportunity do my industrial training here. Thank you for all the advice and guidance as I'm working here as trainee. To all the Stesen Penyelidikan Pertanian Kabuloh's staffs, big thanks I said for the warm welcomed and a very nice hospitality that had been provided for me in order to complete my industrial training.

During these 3 months working at Stesen Penyelidikan Pertanian Kabuloh as a trainee, I am exposed to many new experiences which are very valuable for me to learn and carry out when I face the real world of working in the future. Great experience

VISION

Spearheading commercialization of agriculture and transformation of agriculture community to achieve high income.

MISSION

We commercialise and modernise agriculture to improve income of the agriculture community.

OBJECTIVES

The objective of this section is to conduct a research ~~station~~. The section take action to produce a ~~crop~~ with high quality that to recommended for farmer. That section also provide a plot for demonstration model for the farmer and with the farmer. That to promote the skill to farmer how to manage the plants. The section also had to be a role for all farmer with give advice and introduce a new technology or varieties that should to be done with courses or from extension agents expose.

CONCLUSION

There are too many things that I have learned from this industrial training. I'm very appreciative of all the knowledge that has been shared with us. The three months of my industrial training have taught me that real job life is far away from students' life. We have been exposed to a lot of things that we were never taught in class. The environment also differs. Communication is the most important thing as it will help us to reach that understanding between the members. The good relationships and bonding between the staffs and me make me feel like I'm home because of their warm welcome. Lastly, thank you again for the knowledge that they gave to me. To those who involve either directly or indirectly, your support is much appreciated. Thank you.
