EXECUTIVE SUMMARY

This report outlines a 24 weeks industrial experience at Cohu Malaysia Sdn. Bhd., a company that produces semiconductor test and inspection equipment worldwide. Cohu Malaysia is a large manufacturing and engineering centre that is operated in Ayer Keroh at Melaka. The firm provides sophisticated test handlers, testers, interface solutions, as well as spare parts which serve the electronics, automotive and industrial markets. The company spends a lot of emphasis on innovation, quality, and sustainability as guided by its mission to improve semiconductor manufacturing by offering efficient test cell solutions.

The trainees were assigned to the Spares Department which is one of the important departments in the documentation of spare parts, coordination of shipment of spare parts and the management of the spare parts. The trainees were specifically designated to the sub-unit within the Spares Department and day-to-day work was to scan pick slips, update planner systems, shipment documentation, watch the capacity of the warehouse/QC. These activities helped in easy functioning in the department and provided a great learning experience in the field of real-life logistic functionality, documentation, and cross-functional collaboration in a global firm environment.

This internship enabled the trainee to acquire important skills to be used at the workplace such as time management, flexibility, and communication. The experience also gave me an insight into Cohu organizational culture and strength of operations and weaknesses that it identified using a SWOT analysis. It was recommended to increase the efficiency of communication, employee career development, and resilience to global supply chain and regulatory risks- to ensure that Cohu Malaysia has the competitive edge in the rapidly changing semiconductor market.

ACKNOWLEDGMENT

First and foremost, Alhamdulillah and thanks to Allah SWT with HIS consent in the memorable for these opportunities of internship at Cohu Malaysia Sdn. Bhd which takes 6-month industrial training. Also, I was giving the opportunity to gain various experience in my live as students. I am extremely grateful to Cohu Malaysia Sdn. Bhd. for giving me the opportunity to participate in my industrial training at their company. I was able to put the things I learned in university to practical use. I appreciate the encouragement from my workplace and the variety of assignments that taught me a lot about the industry.

I am grateful for the support, encouragement and suggestions my industry supervisor, Nurfarhalyana binti Idris and Umi Syahirah binti Mohamed Fazlee has provided during my entire training. Because they were willing to help and share their knowledge, I was able to improve both my career and personal life. I appreciate all the team members and colleagues at Cohu for being kind, patient and helping me during my training.

I would like to express my gratitude to my faculty advisor, Dr. Anidah binti Aziz and all the lecturers from my university for preparing me for this training. Because of their commitment to teaching, I was able to handle the challenges I faced in the workplace. I am grateful for the support they have given me all along.

In addition, I want to acknowledge my family and friends, who have constantly supported and stood with me as I explored this subject. Thanks to them, I have been able to keep going with a positive mindset. This journey would not have been as meaningful without the contributions and encouragement of everyone mentioned above.
