## ACKNOWLEDGEMENT

Firstly, I would like to thank the campus for giving this opportunity by letting me have industrial training at Agriculture Training Centre (ATC) or Pusat Latihan Pertanian (PLP) Sg. Sebiew Bintulu. It was a big deal experience for myself. I am glad that I can spend time about three months here by learning a lot of skills, experiences and knowledge that I just have learned from my lecturer before in class.

Next, I would like to thank Pusat Latihan Pertanian Sg. Sebiew for letting me have industrial training there. Thanks to the PLP Principal Mr. Awang Zainuddin Bin Awang Arshad for letting me do my industrial training there and introducing me to all staffs and units that were available at PLP. Not forget also to Fishery Assistant Mr. Hasbie Bin Hj. Bakar and his assistant Mr. Hussaini Rani for teaching me how to feed the fishes in the pond and how to catch the fishes in the pond. Then to Herbs Assistant Mr. Simon Wan, I would like to thank for introducing me many types of herbs that are actually important in our daily life. Thanks also to Ms. Easter Lawrence Luta the Assistant of Landscape Unit for introducing me more detail about the ornamental plants and also to his assistant Mr. Guyang Gerasi for helping me in mixing the soil into the polybags. Last but not least, to Mrs. Empenai Adang the Assistant of Commodity Unit, thank also for letting us get more experience in that unit and to her assistants Mr. Juing Kungsi and Mr. Mazlan Mashod for supervise and teaching us how to do pruning, applying the fertilizer and many more.

Lastly, I would like to thank to my friends who were involve with this industrial training during these three months for giving the helps and supports in finishing this internship activity. Not forget to thank to my parents because they always give me supports, advices and money for me surviving during my training at PLP.

## INTRODUCTION OF COMPANY

ATC (Agriculture Training Centre) Sungai Sebiew is one of component under Department of Agriculture Bintulu Division that located about 18 kilometres from the city and it covers an area of 70 hectares. The pictures above show the map of ATC area.

This centre was established in 1972 with an open area for agriculture training centre purposes and also as crop production centre to be distributed to other location n Bintulu area. The first intake of participants was conducted in 1976.

In terms of activities, there are 6 kinds of courses that have been known as Short-Term Courses.

The courses are:

1. Rubber Crop Technology
2. Oil Palm Crop Technology
3. Vegetable Crop Technology
4. Freshwater Fish Livestock Technology
5. Food-Processing Technology (Basic Pastry)
6. Rattan Craft Weaving

## CONCLUSION

After finish the practical training, it is very useful to what I have learned during my internship period at the ATC Sungai Sebiew Bintulu because some of the activity is really related with what I have learned in class. The practical is easy to understand than learning the theory in the class. This is because we need to imagine how does it happen and react. The maintenance works of what we practice look easily but after we handled all the work it is not quite easy than we thought this before in class. One important thing is just think positive and work hard to gain an achievement during practical training.

I do believe that ATC was succeed to wake me up to restrain myself learn how to adapt the working situation. It is very important to gain more live experiences as much as knowledge before stepping into the world of working. I have met all staff with different rank and position according their section. And we have learned a lot of experience from them during our practical. They give us some advice with supports and teach us how to work efficiently.

Lastly, having a practical training at ATC is the best choice as to improve the understanding for what they have learnt and adapt it into real life practices. I hope that UiTM will continue send their students for practical training in order to increase the achievement of students during their internship period and they also can to learn new things at new place.
