

# Telepharmacy Talk by Alpro Pharmacy –

By Mdm. Nur Syazwani Taridi

## *Bridging the Gap: Telepharmacy Implementation in Modern Community Pharmacy Practice*

### Preparing Future Pharmacists

As part of the crucial preparation for our fourth-year students stepping into their upcoming telepharmacy clerkships, the resource person for course code PHC691 (Applied Therapeutics in Gastrointestinal, Endocrine, and Renal Diseases), Mdm Nur Syazwani Taridi, successfully coordinated an insightful industrial collaboration with Alpro Pharmacy. On 19th May 2026, fourth year students and staff gathered at DK10, UiTM Puncak Alam Campus, for an educational session titled "Telepharmacy in Practice: From Concept to Community Pharmacy Implementation".

The program kicked off with an enthusiastic crowd, leading into the highly anticipated core sharing session by Ms. Ng Yi Ling, the Professional Care & Development Manager at Alpro Pharmacy. Ms. Ng brilliantly guided our future pharmacists through the foundational concepts of ePharmacy, outlining the practical benefits and dynamic challenges encountered in community implementation. By diving into backend digital workflows, automated screening systems, and remote patient monitoring tracking, the session perfectly complemented the clinical and therapeutic scope of PHC691. Students actively analysed real-world digital case scenarios, discovering how to navigate rigorous legal requirements under the Poisons Act 1952 and manage AI-driven triage prompts safely. The core educational message emphasised that while technology optimizes patient reach, a pharmacist's human clinical judgment and ethical responsibility remain completely irreplaceable when evaluating hidden clinical risks and safety red flags.

## *Digital Pharmacy in Practice*

## *Memorable Closing Session*

The event wrapped up with an interactive Q&A session where our students enthusiastically clarified their clinical and career inquiries. The closing ceremony was officially officiated by the Head of the Pharmacy Practice and Clinical Pharmacy (PPCP) Department, Assoc. Prof. Dr. Shubashini, who highly praised the timely digital initiative. As a memorable gesture of gratitude from the faculty, a token of appreciation was proudly presented by Assoc. Prof. Dr. Mohd Shahezwan to our guest speaker. We are incredibly confident that this valuable exposure will ensure our graduating students excel confidently and ethically in their upcoming clerkships!
