	LIST OF ABBREVIATIONS	XIV
	LIST OF APPENDICES	XV
1	INTRODUCTION	
	1.1 Background	1
	1.2 Objectives	2
	1.3 Scopes of project	2
	1.4 Limitation of project	2

2	LITERATURE REVIEW	
2.1	Literature Review	3
2.1.1	Tank	4
2.2	Basic Component	5
2.2.1	DC Power Supply	5
2.2.2	DC Motor	6
2.2.3	Diode	6
2.2.4	IR Receiver Modulator	7
2.2.5	Arduino UNO R3	8
2.2.6	Songle SPDT Relay SRD 05V	9
3	METHODOLOGY	
3.1	Methodology	10-11
3.1.1	Circuit Design	12
3.1.1.1	Circuit Description	12-13
3.1.2	Software Design	14
3.1.2.1	Arduino Software	14-16
3.1.2.3	Programming Description	17
3.1.2.3	Program Flow Chart	17-18
3.1.3	Hardware Design	18-20
3.1.4	PCB Design	20-35
4	RESULTS	
4.1	Chapter Overview	36
4.2	Result	36
4.2.1	Result Description	35-36
4.2.2	Movement of Basket Robot	36-38
4.2.3	Specification of Project	38
4.3	Discussion	39

ACKNOWLEDGEMENT

Alhamdulillah, praise to Allah with all His blessed, finally we are able to complete this final year project successfully. During the progress of this project, we had gone through many obstacles and frustration as well as joy along doing this project.

Very special thanks to our supervisor, Madam Siti Nur Aishah Binti Che Kar whose always guide us in order to make this project done on time and became reality yet successfully. She always gives her commitment and full of support to us. We had own her so much. Although we always seek her if we have any problem regarding this project, she always gives her hand without any sigh at all.

Lastly, we would like to dedicate our thanks to our very beloved parents and all of our family that also contribute to the success of this project. They had given us much moral support as well as supporting money to help us accomplish this project perfectly. We also would like to say a very sincerely thank you to our group members that had given full of commitment and dedication to this project.

ABSTRACT

In this new era, there are many work nowadays in this life used a big force to solve it. Because of that, much kind of technology is being developed in order to get an easier life yet practical. Hence, these projects are created. The main purpose of this project is to constrict the problem to the handicap and elderly when they went to carry an object that heavy and need lot of strength. In order to make this project become reality and successful, there are many initiative that have been taken due to nowadays technology to upgrade the safety of this project which will be used by the elders and handicap people. This is where the project called the “Basket Robot” is developed with a complete system that is function to bring and move heavy objects from one place to another place. When the robot is switch on, user can start sending a signal to the robot by using its remote control. The robot will receive the signal through its receiver and start the operation of the motor according to the signal given. Hence, the elders and handicap people can bring and move their goods to any places by using this project.
