ACKNOWLEDGEMENTS

With the name of ALLAH SWT, peace and blessing upon prophet Muhammad SAW, we are totally be gratefull to Allah because successfully finishing our practical training safely and prepare this report.

We (arnasil julakjam and fairul abdullah) would like to take this chances to say thank you very much to En. Ismail Bin Kassim as a Project Manager of SAFODA Lumat Beaufort because give us upportunity to do our practical training and learn on how to plant a rubber tree.

We also want to say thanks to En Sanan Gutang, En. Justin Golontoh, En.Yusof Bin Matnoor, En. Albert Sibun, En. Oswald Kumpat, Pn. Rubiata Gimba, Pn. Rusina Gunting and En.A.Norajiman Bin Ongot that help us so much in performing our task in completing our practical training and reports.

To all the workers, either in nursery and fields, we are totally appreciate the cooperation that they give us throughout 14 weeks our practical there and also the knowledge and skill that they teach us especially in the rubber plantation such as budding, planting and others that related.. We also want to give a thanks to uncle Charles, and Benno for their help driving us every day we go and back to the fields.

Special thanks to our lecturer of Industrial Training, Mr. Hamjah Rusli because of her effort in getting place for our industrial training and all the lecturers of DPIM because always support us to be a success person.

Thanks also to our parents, our family members and friends because of their support for us in term of financially and morality until we finished our practical training.

EXECUTIVE SUMMARY

This report represent our practical training on SAFODA Lumat, Beaufort SABAH that takes 14 weeks to be completed which start on 10 June 2013 and ended on 13 September 2013.

Based on information that we gained from the agency during our practical we can conclude that the area of SAFODA estate is 1613.8 ha and can be divided into 3 division which is nursery, source bush and fields.

In nursery area, the activities involve is planting using seeds. After that followed by budding, watering, manuring, pruning and weeding then the budded plant can be transplanting.

In source bush area. The maintenance that include in the source bush is planting, weeding or herbicide spraying, manuring and cut back of the stem or also called as harvesting of the bud stick whic use in budding process.

The last one is in the field area. The activities involve are divided into three major part, before planting, while planting and after planting. The activities before planting is road construction, site preparation that consist of four major part (under brushing, felling, mechanical clearing & stacking and terracing). While planting, lining and poling, seedling transpotation, holing, manuring and planting. After planting the maintenance that involve is manuring or fertilizing, weeding/slashing/ herbicide spraying, pruning, census, pest and disease control and harvesting.

TABLE OF CONTENT	iv, v, vi
LIST OF FIGURE	vii
LIST OF TABLES	viii

CHAPTER 1	INTRODUCTION	Page
1.1	Estate background	1-2
1.2	Estate map	2-4
1.3	List of workers	4
1.4	Mision, vision & objective	5
1.5	Organization chart	6
1.6	Training schedule	7

CHAPTER 2	NURSERY MANAGEMENT / MAINTENANCE	Page
2.1	Planting	8-9
2.2	Watering	10
2.3	Manuring / fertilizing	10
2.4	Weeding / herbicide spraying	11
2.5	Pruning	12

CHAPTER 3	SOURCE BUSH MANAGEMENT / MAINTENANCE	Page
3.1	Planting	13
3.2	Weeding / herbicide spraying	13
3.3	Manuring /fertilizing	14
3.4	Cut back / harvesting of the bud stick	14

CHAPTER 4	FIELD MANAGEMENT / MAINTENANCE	Page
4.1	Before planting	
4.1.1	Road construction	15
4.1.2	Site preparation	16
	a) Under brushing	
	b) Felling	
	c) Mechanical clearing & stacking	
	d) Terracing.	
4.1.3	Chemical weeding	17
4.2	While planting	
4.2.1	Lining and poling	17
4.2.2	Seedling transpotation	17
4.2.3	Holing, manuring and planting	18
4.3	After planting	
4.3.1	Manuring	18
4.3.2	Weeding / herbicide spraying	19
4.3.3	Pruning	20
4.3.4	Census	20
4.3.5	Pest and disease control	20-21
4.3.6	Harvesting	21
4.4	Legume cover crop planting	22
	Production of mucuna seedling	
	Transport	
	Holing	
	Planting	
	Manuring	
	Poling	
	Protecting of mucuna	

CHAPTER 5	COST INVOLVE	Page
5.1	Cost involve	23
5.2	Future revenue	24
