ACKNOWLEDGEMENT

Bismillahirrahmanirrahim, first of all we would like to say that we are grateful to God delicate mercy and blessing for us to complete and prepare this object. We would like to give our appreciation to Madam NikNurShaadahBintiNikDzulkefli, our supervisor for this project who gives us guidance and advices in order to complete our work. She had given us plenty of valuable ideas and opinions for us and we are really glad to accept her helps. On the other hand, we would give our thanks to our parents for being supportive and help us especially in financial. We sincere thanks go to all friend and members of the staff (technicians) of the Faculty of Electrical Engineering UiTM Dungun, who helped us in many ways and made us stay at UiTM pleasant and unforgettable.

Today, education plays a really important role especially to youth who will become leaders in future. Technology had become an important aspect in everyday life as its existence may help us to ease our life. Because of that, we must gain new knowledge and experiences in order to help us to succeed in our life. From this project, there are also a lot of advantages such as, the relationship between our lecturer are more closed and our friendship is more closed. Besides that, we have learn about to manage the time. When we want to continue our study in degree, there also has their project, from there it become easier to us because we have a basic and experience before.

ABSTRACT

This project is mainly about safety handbag that operated as an alarm. This project will help people especially women that probably became victim by the snatching thief during their daily life. These projects will active the alarm when the thief tried to snatch the bag and sound from the alarm will attract the attention of other peoples. With that attention, it can save the victim from get losing on their valuables thing and most important can save their life. We also add powerbank circuit and combined it with this project to be main source for this project. Therefore, the powerbank also will help the user facilitate to charge their cell phone if their cell phone having lack of battery power. So that to revive the power of powerbank the user needs to plugs in the powerbank onto electric plug sources. With the completion of this project, hope it will give benefits to help peoples a lot.
