ACKNOWLEDGEMENT

Most of all, I want to acknowledge and thank to Allah s.w.t with my deepest gratitude for the miracles He has performed in my life for the completion of this practical report. I am able to complete this assignment which facilitated the completion on this industrial training report. This Industrial training report would have not been carried successfully without the cooperation from many parties who contributes in preparing and completing this study.

On 30th November 2015, I have started my industrial training at FELCRA BERHAD KAWASAN KUALA GEMILANG at lawas and ended on 6th March 2016. I have learned a lot of things in 3 months of industrial training of period. Anyways, I would like to give my thanks to both of my parent, Mr Salim bin Lagiman and Mrs Halijah binti Aman for their endless moral support and also financial support

Next, I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. A special gratitude I give to my supervisor from Universiti Teknologi Mara (UiTM) Sarawak so do called as my lecturer, Mr Muhammad Syukrie Bin Haji Abu Talip, whose contribution in stimulating suggestions and encouragement, helped me to coordinate my industrial training especially in writing this report.

Futhermore, I would also like to acknowledge with much appreciation to manager of Felcra Berhad Kawasan Kuala Gemilang, Mr Abdull Wahab Bin Jusoh, my supervisor in –charge, Mr Mohd Zain Bin Selamat, and Mr Salim Bin Lagiman. Thanks for all the guidance and knowledge as I'm working here as a trainee. Special thanks goes to all the Felcra Berhad Kawasan Kuala Gemilang staffs for the warm welcomed and a very nice hospitality that had been provided for me in order to complete my industrial training.

During these 3 months as a trainee, I am exposed to many excellent experiences which are very meaningful and valuable for me to learn and carry out when I face the real world of working in the future. In this period, I have learned to work as a team and learned how to communicate with community who came from differences ages and life background.

Lastly, to those whose is involved directly and indirectly by helping me, I would like to give my gratitude for having me as their trainee at Felcra Berhad Kawasan Kuala Gemilang, lawas. Thanks for the knowledge and helped me to learn and build the disciplines that had been shared by them to me, I might not be able to experience about working environment.

INTRODUCTION

Introduction of Industrial Training

Industrial training is a medium where the students will be introduced to the real situation in the farm besides to give exposure and experience to the students about the real situation in their respective fields and early preparation for students before they enter the working world.

Industrial training is a prerequisite to the award of Diploma students In Planting Industry Management, Universiti Teknologi Mara. For sessions from NOVEMBER UNTIL MARCH, I was following industrial training for three months, starting from 30 NOVEMBER 2015 until 6 MARCH 2016.

The Importance of Industry Training

Industrial training is one of the branches of which will provide an opportunity for each student to practice all what has been learned in class to use when attending industrial training. It also can be seen from different views, as an example, indirectly it can refine skills already found in the student's own and acquire skills and knowledge in a particular field of work through training industry that has followed.

In addition, industrial training also helps the student to reduce nervousness and feeling awkward when students face a real working world and will realize the ambition and dreams while studying. All the solutions done during industrial training conducted, students will gain experience in resolving a problem and be a coming of age for our self. Indirectly, it will provide awareness to each student that the situation at work is actually not as easy as like what they have learned in theory and practical.

On the other hand, industrial training is very important because it can facilitate students to apply for suitable positions for them after graduation. These things could not doubt because employment firms generally very stressed people with high knowledge as well as having work experience. Therefore, it is not impossible for the company to offer a place for former trainees after they finish their studies.

However, each of knowledge obtained during training industry is enormous and will be used whilst in the employment environment. Students can use every experience and skills acquired during the training industry as a guide and supplies on the job later because learning isn't the

same as learning theories while taking industrial training. In addition, difficulties have been encountered during the period of this training will be an effective way and a catalyst for students to improve the performance at a high level and make sure the students become dedicated workers in doing something jobs.

Objectives of Industrial Training

Industrial training is one precedent for each student prior to be entitled to the award of a certificate diploma from Universiti Teknologi Mara, Campus Mukah, Sarawak. The main objective is to provide industrial training to students will experience the world of work before completing their studies.

The other objectives of industrial training are to:

1. Industrial training is aimed reveal to each student with actual work environment and increase knowledge in these areas.
2. As training for learning the theories taught while on a campus.
3. Be able to foster honesty and responsibility in each student and able to cooperate with other staff.
4. Strengthen confidence in each of the student upon completion of training industrial training.
5. . Learn how to have a close relationship with senior officials such as managers, assistant managers and other employees while taking industrial training.
