GROUP	AT1105C
DATE OF SUBMISSION	
PREPARED FOR	SIR MUHAMAD SYUKRIE BIN HJ ABU TALIP

ACKNOWLEDGEMENT

“Internships are great for building experience, confidence, and connections “. Such quote is deeply related to my industrial training where I have undergone my industrial training in a company that I have chosen which is Almamumi Plantation Sdn. Bhd. Here is a start for me to learn a new knowledge and to observe something to be more mature with hopes to pursue a career and dream bigger than myself. With this opportunity I will be dedicated to give thanks and express my deepest appreciation and gratitude to those who involved in making this industrial training a complete success.

First and foremost, I would like to thank God for all His countless blessings throughout this period of industrial training. I am grateful because without His blessings and the strength given to me, I am not able to complete and endure six weeks of my industrial training. Apart from that, I would certainly be grateful to Madam Saiyidah Raffhanah binti Basri, the representative from Faculty Plantation and Agrotechnology as she is the one who handled Industrial Training II. A big million thanks to her for preparing all the documents and logbook which are essential for our Industrial Training. Without her, none of this would have possible. Will not be forgotten, I would like to sincere gratitude to all the staffs at Almamumi Plantation especially to General Manager, Mr. Amran bin Alam for accepting me as an intern student at their company. Throughout the journey of my internship, I gained a new knowledge about the real world of working at plantation as a preparation for the students before they faced the challenging work after they graduate. Without their guidance, there is nothing that I can got from my industrial training within 6 weeks.

Finally, my full appreciation is dedicated to my family members who are always behind my back, supporting me to undergo this course event. Thanks to them for giving me a confidence to complete this internship successfully and for their time to send me for industrial training at Ulu Sebauh. Without them, I would not be able to be there in time for this industrial training.

INTRODUCTION

This industrial training is one of a mandatory for every student in semester 5 of Diploma in Planting Industry Management which is also the requirements for completing courses as well as to complete the diploma program and graduate from the university. The purpose of this industrial training is none other than to exposes student to a real working experience and expanding the knowledge in their specific field. Other than that, from this industrial training it can helps them in developing the social skills in their working life. This will prepare the students so that they will easily fit in and fulfil the demands of their professions after they finish their course.

OBJECTIVES

- ❖ To exposes student to a real working environment of plantation.
- ❖ To build a self-confidence at the end of training before they faced the real situation of working life.
- ❖ To ensure student gain more knowledge about working in plantation instead of getting to know in a theory class.
- ❖ To produce a trustworthy worker with a high responsibility in doing their task assigned.
- ❖ To improve the leadership skills in making any decisions about something that has happened.
