I would like to thank our campus, University Technology Mara Sarawak Campus Mukah 2 for giving me this opportunity to have industrial practical at Kabuloh Agriculture Research Station. I am very glad had spent three months practical at Kabuloh Agriculture Research Station and able to learn and gaining new experience by direct or indirect way.

Next, I would like to thank Officer-In-charge (OIC) Hajah Rosmah Haji Jaffar for her guidance and support for all the time I had spent in Kabuloh Agriculture Research Station. Besides that, I would like to thank Research Officer (RO) John Jadol and RO Shariah Binti Umar for their assist and guidance during my industrial practical, without their help I would not able to finish my industrial practical well done.

I also would like to thank the supervisor, PT Lilianita, AA Muriani Harry, AAO Razaman Ibrahim, SAA Yusli Sawal, AA Sandra Faradilla, AA Desmond Rangub, SAA Agam Giang and AA Nikki for their cooperation in providing materials and information to me to complete this report. I had new experience and knowledge during three months practical in this station. Then, I would like to thank to all staff in every section for assist giving me a valuable information and suggestion to complete this training report.

Then, I would like to express my appreciation and thanks to my Diploma in Planting Industry Management lecturer, Mr. Muhammad Syukrie Bin Abu Talip for giving me advice, guidelines and information during the process of completing this report. I also would like to thank my parents for giving their support in terms of moral and financial support for me to complete this assignment. Without their support, I might not be able to complete this assignment.

Not forget also, I would like to say thank you to my friends and classmate for sharing their knowledge and advice to complete this report. Lastly, I would like to thank to those whose have helped me to complete this report directly or indirectly.

Sincerely, thank you.

KABULOH AGRICULTURE RESEARCH STATION

Kabuloh Agriculture Research Station is an integrated agriculture station of Northern Sarawak which is originally known as Luak Station. It was started in 1964 as an oil palm experimental station and has undergone many changes in its management, functions and land use after 38 years of its existence. The scope of research has been expanded from being a mere oil palm experimental station to conduct a multi crop field research station which covers fruit trees, cocoa, coconut and food crops. Since 1990, the station has further transformed from being purely an experimental station for upland crop research station into fully integrated agriculture station. There are also other sections in the station such as fruit section, herbs section, commodity section, mixed fruit section, field crop section, inland fisheries section and PPKS-SAVTI (Sarawak Agriculture Vocational Training Institute). SAVTI is a school offering specially designed courses to meet the needs of the oil palm industry.

The station is situated in Sibuti sub-district about 48 km by road from Miri. Initially the station has 550 ha but left approximately 200 with the remaining 300 ha utilised by Perikanan Darat, Taman Kekal Pengeluaran Makanan (TKPM), Pusat Pembangunan Kemahiran Sarawak (PPKS) and Pertubuhan Peladabg Kawasan (PPK) Subis. The major roles of Kabuloh Agriculture Research Station are:

- I. Research
- II. Technology transfer
- III. Advisory services to farmers
- IV. Provide training for training staff
- V. Diseases and pest control, increased yield and crop information

KABULOH AGRICULTURE RESEARCH STATION VISON AND MISSION

VISION

Spearheading commercialization of agriculture and transformation of agriculture community to achieve high income.

MISSION

We commercialise and modernize agriculture to improve income of the agriculture community.
