ACKNOWLEDGMENT

Alhamdulillah, writing report has become practical way unusual for me and experience not be alone with the blessings of Allah Al-mighty. I have several people to thank for helping me achieve this exceptional performance and extraordinary.

First, I like to thank to Malaysian Agricultural Research and Development Institute (MARDI), during my practical training all the staff of MARDI and especially Mr Gregory Lipong always give a guidance and knowledge. In this practical training I have many experience and do a practical based on the lecture.

In addition, the most importance for Faculty Plantation and Agrotechnology, Mr Syukrie bin Abu Talip and all of lecturer to allow and continuous support in our training practical and I very appreciate and thanks to those involved.

Last but not least, I have a family and especially my parents, Sebur bin Mohamad and Zaiton binti Kadi because always give a moral support, inspiration and always advice to stay motivated and focused. Beside that's I would like to thanks to all my friend always help and give the opinion to do this report.

Lastly, I would like to thanks for those involved especially all the staff of MARDI Saratok, all of DPIM lecturer, my family and lastly for my friend always helps and give the opinion.

Thanks you.

1. INTRODUCTION OF INDUSTRIAL TRAINING

Industrial training as a generally known, as practical work learning by doing provide opportunities to student to enhance and apply what they have learned in their academic programme. Beside that's it provides pre-professional work experience with specific assignment and responsibilities. An industrial training should be relevant to a student personal career interest and academic course study. Productive industrial training help students make informed decisions and improve their marketability after graduation.

1.1 OBJECTIVE

- ✚ To educate the DPIM students to become a professional person with the characteristics are credibility, responsible hardworking level. And also are sincerely religious in exploring the earth with responsibility especially in agriculture.
- ✚ To develops estate with plenty of crops as convenience when the student having their practical training.
- ✚ Complete the equipment that is use for agriculture for the student convenient to achieve goals and to rise up the student potential in agriculture.
- ✚ To have are responsible, positive attitude and with the highly moral ethics of workers when giving their services.

1.2 IMPORTANT OF INDUSTRIAL TRAINING

- Student can get the feel of the work environment.
- To apply student knowledge taught in the lecturer rooms in real industrial situation.
- Student can use the experience gained from the industrial training in discussion held in the lecturer rooms.
- Student will also knowledgeable and understanding about matter related to their field of study, after practical lessons.

2. ORGANISATION BACKGROUND

MALAYSIAN AGRICULTURAL RESEACH and DEVELOPMENT INSTITUTE

2.1 Establishment and Background

MARDI at the early establishment 1971-1972.

MARDI was established with the main objectives of generating and promoting new, appropriate and efficient technologies towards the advancement of the food, agriculture, food and agro-based industries.

MARDI is managed and guided by the regulations and policies set by the MARDI Governing Board and consented by the Minister of Agriculture And Agro-Based Industry. In matters pertaining to finance the consensus of the Minister of Finance is also obligatory.

Whereas, the Scientific Council ensures that MARDI technical programs attain the highest quality and level of competence.
