i. ACKNOWLEDGEMENT

I want to acknowledge and Alhamdulillah thank to Allah s.w.t for the miracle He has performed in my life to me completed of my industrial training and this report. I would express my thanks to Universiti Teknology Mara (UiTM) for giving me opportunity and encouragement for me to doing this industrial training. I also like to express my thanks to our lecturer especially Sir Muhammad Syukrie Bin Abu Talip for managing my application to doing my practical traing and for the encouragement during my practical training.

Highest thankful given to Setuan Plantation Snd. Bhd Ladang Setuan for accepting my application for doing my practical training and give good hospitality. My special thanks to supervisor in-charge Mr. Ringgir Anak Musyid and Mr, Rosli Bin Ismail for giving me lot of guidance and knowledge during the practical on field.

Lastly I would express my thanks to my family and friends for the support during the practical training. Thanks for their direct and indirect support especially for my family with financial support until I can complete my training for 3 months.

INTRODUCTION

1.1 Introduction of practical training

Industrial training is a medium where the student expose to the real experience in the farm and about the real situation in their respective fields and early preparation for student before they entered the real working world. Industrial training Industrial training is a prerequisite to the award of Diploma students In Planting Industry Management, Universiti Teknologi Mara.

1.2 The importance of industry training

Industrial training is one of the branches of which will provide an opportunity for each student to practice all what has been learned in class to use when attending industrial training. It also can be seen from different views, as an example, indirectly it can refine skills already found in the student's own and acquire skills and knowledge in a particular field of work through training industry that has followed.

In addition, industrial training also helps the student to reduce nervousness and feeling awkward when students face a real working world and will realize the ambition and dreams while studying. All the solutions done during industrial training conducted, students will gain experience in resolving a problem and be a coming of age for our self. Indirectly, it will provide awareness to each student that the situation at work is actually not as easy as like what they have learned in theory and practical.

On the other hand, industrial training is very important because it can facilitate students to apply for suitable positions for them after graduation. These things could not doubt because employment firms generally very stressed people with high knowledge as well as having work experience. Therefore, it is not impossible for the company to offer a place for former trainees after they finish their studies.

However, each of knowledge obtained during training industry is enormous and will be used whilst in the employment environment. Students can use every experience and skills acquired during the training industry as a guide and supplies on the job later because learning isn't the

1.3 Objectives of Industrial Training

Industrial training is one precedent for each student prior to be entitled to the award of a certificate diploma from Universiti Teknologi Mara, Campus Mukah, Sarawak. The main objective is to provide industrial training to students will experience the world of work before completing their studies.

The other objectives of industrial training are to:

1. Industrial training is aimed reveal to each student with actual work environment and increase knowledge in these areas.
2. As training for learning the theories taught while on a campus.
3. Be able to foster honesty and responsibility in each student and able to cooperate with other staff.
4. Strengthen confidence in each of the student upon completion of training industrial training.
5. . Learn how to have a close relationship with senior officials such as managers, assistant managers and other employees while taking industrial training.
