ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious, Most Merciful , Peace and blessings be upon Prophet Nabi Muhammad Ibni Abdullah SAW, the holy family and his companions selected .Alhamdullilah, I would be grateful to the Almighty God because permission , blessing and His guidance enabled me to complete an industrial training , completing the writing of this report and will entitle me to receive a diploma .

For three (3) months I undergo my internship that on 6hb Jun 2016 last year till 11hb September 2016, I finally successfully completed my Industrial training report. I also would like to extend my thankfulness to the most precious person in my life, my father and mother for all their moral support, financial support and also to my friends for never ending reminding me to always be honest and trustworthy during my training here. A very thank you to Mr. Muhammad Syukrie Bin Abu Talib because give a lot of guide for me and planters student to finish my industrial practical training. Last but not least I would like to extend my appreciation to my industrial estate assistant manager Mr. Tarmizi My Supervisor in-charge and other assistance manager of Judan estate because gave me useful experience in plantation field and advices. Not forgotten for all the staffs, I very much appreciate for their entire kindness helping and teaching me when I'm working there. I am very lucky to have much a helpful colleagues and I never felt out in any situations.

I am entrusted to undergo my industrial training at Solar Green Sdn Bhd for three (3) months before I can complete my subject (AGR 390) in order to graduate. During these 3 months working here I am exposed to many new experiences which are very valuable for me to learn and carry out with devotion when I face the real world of working in the future. Undergoing for industrial training has become one of the curricular that college student compulsory to attend especially for those who studied at IPTA. The motive of this action is to expose students and let them experience the environment of the real world of working before graduating. It is also to prepare students to face the real challenge and learn how to find solution when problem encountered besides completing the course. This exposure not only will prepare the students but it is also a great opportunity to gain knowledge at industry. Besides that, it can prepare students on how to polish more their soft skill especially on how to communicate with others and learn to do work in a group. At college students usually communicate with people around their ages but when working there are differences in ages and this required communication skill. I also have learn how to control the foreign people by

Tradewinds Plantation Berhad

Tradewinds Plantation Berhad's oil palm plantation in Malaysia covers the geographical areas of Peninsular Malaysia, as well as Sabah and Sarawak in East Malaysia. There are a total of 77 managed estates , sprawled over 132 ,940 hectares.
