## ABSTRACT

Pawfit CarryGo+ Smart Cat Carrier is a revolutionary new product in the pet care industry that changes the way people care for and interact with their cats. This carrier focuses on comfort, safety, and smart monitoring. Pawfit CarryGo+ gives pet owners real-time, data-driven information about their pets' health and happiness. The advanced technology integration at the heart of this new carrier is what makes it so special. The intelligent camera enables owners to monitor their cats in real time, allowing access from any location at any time. Pet owners can consistently ascertain the precise location of their pet when utilising GPS tracking. Health-monitoring sensors make the experience even better by keeping track of important health information, which helps owners keep their cats healthy and comfortable. Pawfit CarryGo+ is made of EVA (Ethylene-Vinyl Acetate), which is light but strong, long-lasting and easy to clean. Its ergonomic design makes sure that cats of all sizes and breeds are as comfortable as possible. This makes it great for daily commutes, weekend road trips, and even long-distance air travel. The included smartphone app makes it easier to keep track of everything by putting all the important information at the owner's fingertips. Pawfit CarryGo+ stands out in a market that is growing quickly among pet lovers due to its practicality. It shows how new ideas and smart technology can make customers happy and businesses sustainability, all while keeping pets safe and happy. Pawfit CarryGo+ transcends a mere carrier as it represents a comprehensive solution poised to revolutionise pet care in the future.

**KEYWORDS:** business sustainability, economic viability, GPS tracking, health-monitoring, smart technology

## PROBLEM AND OBJECTIVE

A pet carrier is an essential accessory for every pet owner, serving as a safe and legal means of transporting pets whether for veterinary visits, travel, or public outings. In addition to being convenient, carriers are essential for guaranteeing the security and welfare of pets. Traditional pet carriers often fail to address the core needs of pet owners and their cats, leading to discomfort, stress, and potential safety risks during travel. Many existing carriers lack proper ventilation, secure fastenings, and stability, increasing the risk of injury or distress for the pet. Furthermore, pet owners experience anxiety due to the inability to monitor their pets in real-time, especially during long trips. There is a clear need for a more sophisticated solution given the growing worries about pet safety, theft, and health monitoring. Pawfit CarryGo+ addresses these challenges by integrating real-time smart camera monitoring, GPS tracking, and health sensors, allowing

owners to ensure their cat's well-being at all times. In reaction to these concerning occurrences, we have taken the effort to create **Pawfit CarryGo+**, an innovative solution.

The objective of the carrier is to provide a comfortable and safe travel experience for cats by featuring soft, breathable padding that reduces stress and ensures a cozy environment. It prioritizes safety with secure fastenings and a stable structure to minimize movement during transit. A carrier that integrates real-time monitoring by smart cameras, where the owner may track his cats on the spot by use of the Mobile App. GPS tracking and health-monitoring sensors come in place to secure your pet in safety and in good health. The light and sturdy EVA (Ethylene-Vinyl Acetate) material is suitable for both short and long trips, and also easy to clean. Moreover, Pawfit CarryGo+ focuses on innovation for the smart cat carrier to ensure it has a realistic chance of improving the environmental performance of commercial practice in the pet product sector.

## DESIGN DESCRIPTION

This smart carrier embodies a synthesis of compassion and technology innovation, engineered to offer a safe, sophisticated, and advanced method for transporting and safeguarding cats. Pawfit CarryGo+ revolutionises pet mobility by incorporating advanced technology into a pet carrier, emphasising comfort, security, health for cats, and real-time monitoring. It incorporates a real-time GPS tracking system, enabling owners to continuously watch the carrier's whereabouts. The carrier features a health monitoring system that records vital indications, including heart rate and stress levels, facilitating immediate intervention if the animal exhibits distress. An integrated camera provides live-streaming functionality for remote surveillance, while the emergency alarm system informs owners of any detected dangers in proximity to the carrier. Pawfit CarryGo+ not only fulfills the urgent requirement for animal safety in response to recent incidents but also exemplifies our dedication to utilising academic expertise to resolve practical challenges. Pawfit CarryGo+ leverages on technology to enhance animal welfare and foster a safer, more humane environment for all creatures.

## VISUALS

Figure 2: Pawfit CarryGo+

**NOVELTY AND UNIQUENESS**

The Pawfit CarryGo+ stands out for its cutting-edge features made for modern pet owners. The carrier has a built-in smart camera which enables for real-time video monitoring with motion alerts. This can alert owners of unusual movements, enabling them to take quick action to resolve possible problems. GPS tracking helps owners track the carrier's location in real-time, which includes automatic updates on the carrier's location and offering geofencing choices. Vital signs such as temperature and heart rate are tracked by sophisticated health-monitoring sensors, which provide current updates via a mobile app. This feature is particularly helpful for the comfort and safety of cats who are old or with special needs. The carrier features high-quality ergonomic cushioning that conforms to the cat's body shape, offering optimal comfort throughout travel and facilitating a stress-free experience through the use of hypoallergenic, breathable, and washable materials.

**BENEFITS TO MANKIND**

The Pawfit CarryGo+ is designed with a focus on practicality, providing a seamless travel experience for both pet and owner. Its user-friendly design is complemented by a mobile app that offers real-time monitoring of the carrier’s location, health and activity, ensuring peace of mind during travel. Constructed from durable EVA (ethylene-vinyl acetate) material, it offers a lightweight, flexible, and easy-to-clean solution, making it ideal for frequent use. The ergonomic padding ensures maximum comfort, while built-in GPS tracking and a smart camera allow for continuous monitoring, enhancing the overall safety of the pet.

**COMMERCIAL POTENTIAL**

Pawfit CarryGo+ has strong commercialization potential due to the growing demand for smart pet products and technological innovation in pet care. Potential customers for Pawfit CarryGo+ are pet owners, frequent travelers and pet care enthusiasts. We are very sure that pet owners would be willing to invest in premium products for their pet's comfort and health. Additionally, this Pawfit CarryGo+ is equipped with advanced features such as GPS tracking and useful for pet owners who frequently travel because they can stay connected with their pet and track their carrier while traveling. Pet enthusiasts would spend on this product because of its health monitoring feature that can help them track vitals such as heart rate and temperature. Besides, Pawfit CarryGo+ can be considered as a long-term investment due to its durability that ensures years of reliable use, protecting the pet and enhancing travel experiences.

## CONCLUSION

The Pawfit CarryGo+ introduces a new concept in pet carriers with its unique selling point of enhancing the general welfare of pets during travel considering it has a GPS device, health sensors, and a video monitor. This is a comfortable, strong, practical, and easy to use pet product which would best fit the needs of pet owners who frequently travel. As the pet industry continues to expand, Pawfit CarryGo+ aligns perfectly with the increasing demand for smart technology, convenience, and security in pet care. Due to robust market demand and advanced innovation, it is distinguished as a very feasible and lucrative product for commercialisation. This makes Pawfit CarryGo+ an exceptional investment opportunity, attracting both consumers and business partners in the rapidly growing pet care industry. Ultimately, Pawfit CarryGo+ plays a vital role in enhancing animal welfare by offering innovative solutions to modern pet care challenges. With its practical design and advanced features, it is set to redefine how pet owners care for their animals, ensuring greater comfort, security, and convenience. As a groundbreaking innovation, Pawfit CarryGo+ is set to revolutionize the future of pet care, making it an essential solution for responsible pet ownership.
