Mathventures: An Interactive Busy Book For Early Mathematics Learning

This project focuses on the design and development of an interactive busy book aimed at supporting early mathematics learning in a fun and engaging way. The book introduces fundamental concepts such as number recognition, counting, and basic operations through hands on elements like flaps, puzzles, and movable pieces. Designed with an adventure theme, Mathventures encourages children to actively participate while learning key mathematical concepts.

The design aims to enhance understanding of numbers and basic operations, while also improving fine motor skills and attention. By combining play and education, this project creates an immersive learning experience that fosters interest and builds confidence in early mathematics.
