ACKNOWLEDGEMENT

First of all, thank to Allah because for His Blessing that gives us strength and spirit to accomplish this research report on time and also give us health and prosperous life. Secondly, we would like to thank to people who have supported us during the management and also in setting the assignment.

We especially would like to express our appreciation to our beloved academic supervisor, Madam Nasyrah Binti Ahmad, for her guidance and advices to us in completing this research proposal, so that it has been done with success. Other than that, we also would like to thank all of our friends whose have been very helpful before, during and after this research is done. May Allah bless all of you.

In addition, we would love to thank our parents for them having given us support in many terms especially in financial and also moral. Without them, we will have a very difficult situation in completing this research proposal. Nevertheless, we genuinely hope that this proposal will be one of the sources of references that may assist the others in understanding on the scope of Research Methodology and Data Analysis. This is suitable to our approach of believe that once we gain knowledge, we are responsible to teach others. Insha'Allah. Thank You.

THE DECLARATION

Declaration

We hereby declare that the work contained in this research proposal is original and our own except those duly identified and recognized. If we are later found to have committed plagiarism or acts of academic dishonest, action can be taken in accordance with UiTM's rules and academic regulations.

Signed

Khairun Nisak Binti Farid Waradi

Nabilah Binti Zakariah

ABSTRACT

A safe city can be perceived as a sustainable city, where community can live in more inclusive and secure environment. The security, environment and facilities are important factors that can influence the public perceptions towards safe city. Security is a very vital aspect of life because it ensures that public can feel safe, harmonious and comfortable to live at housing area especially for women and children. In addition, facilities provided also important to prevent the crime incidence frequently occur at housing area. In this research, this study was conducted to determine the public perceptions towards Safe City at Taman Kenanga Seksyen 1, Tengker Melaka. A sample of 169 residents was involved in this study. The main objectives of this study is to determine the contributing factor that lead the public perceptions towards safe city whether it influenced by security, environmental and facilities factor. The statistic techniques used in this study are Descriptive Statistics, Reliability Analysis, Normality Test, Regression Analysis and Pearson Correlation. This study revealed that the most contributing factor that leads to public perceptions towards safe city is environment. Therefore, this study also can enhance the safety situation and public awareness on crime incidence and to conserve the environments at housing area in order to provide better living place for community.
