6.1.2 Green budding technology	36
6.2 The polybag nursery (Young budding)	37
6.2.1 Budded stump in polybag (TCP)	38
6.2.2 Different between ground nursery and polybag nursery	39
6.2.3 Young budding (Polybag nursery)	40-45

ACKNOWLEDGEMENT

Thanks to Allah S.W.T for giving us strength and we had success fully finished our industrial training at Malaysian Rubber Board RRIM Similajau. We know that there are still many lacks of arranging this internship report even when doing our job training and we thank to those who have supported us to perform the job training up to carrying out this report. We also want to give our special thanks to Malaysian Rubber Board for give us opportunity to learn and get the real work experience.

First of all, we would like to express the deepest appreciation to our lecturer Sir Muhamad Syukrie Bin Haji Abu Talip for his advice and giving us chance to do our industrial training for three months to improve our performance and gain more experiences before we complete our Diploma in Plantation Management. He gave us assignment to do work on which was daily report for the log book and full report. This assignment also considered as our revision about rubber plantation which it was one of the major crop in Malaysia.

Besides that, thank to the manager of Malaysian Rubber Board RRIM Research Station Similajau, Mr. Salihin Bin Sekot for accepting us to gain more knowledge and experience working here for our industrial training.

Then, thanks to Research Assistant, Mr. Thomas anak Ningkang, Mr. Giring anak January Enju, Mr. Mohd. Ashraf Bin Ramli and all staff LGM that had gave their kind of help and knowledge to us from starting the practical until the end of our internship. They had taught us practically and we gained more information, extra knowledge and working experienced when working at field.

Last but not least, special thanks to all my friends for give their corporation and a very good commitment in a group of our internship program. Thanks to our family for their support and advice during our practical at LGM Similajau. Thank you.

1.0 ORGANISATION BACKGROUND

1.1.0 MALAYSIAN RUBBER BOARD

Figure 1.1: Logo of the Rubber Industry in Malaysia.

The Malaysian Rubber Board (MRB) is the custodian of the rubber industry in Malaysia. It was established on 1st January 1998, it has under its fold there well establish agencies (RRIM, MRRDB and MRELB), which are now merged into one, which have contributed significantly to the development of the rubber industry for the last 78 years. The R&D excellence in Natural Rubber, accomplished by the rubber Research Institute of Malaysia (RRIM), has an impact on the Malaysian NR producing countries.

The primary objectives of MRB is to assist in the development and modernization of Malaysian rubber industry in all aspects from cultivation of the rubber tree, the extraction and processing of its raw rubber, the manufacture of rubber products and the marketing of rubber and its products.

1.1.1 MISSION

To enhance the competitiveness and viability of the Malaysian rubber industries in the global environment through focused research and development, effective transfer of technology and quality support services.

1.1.2 VISION

To be a leading organization in all area of the rubber industry for the benefits of society.
