Connect People to the Mosque Through Application and Movement

Masjid Go is a mobile application designed to increase awareness and participation in activities at the mosque around Malaysia. The app enables users to explore upcoming events, register easily, navigate the mosque with an indoor map, make digital donations, and manage community services such as Khairat Kematian.

Guided by the concept "Your Journey Starts Here," Masjid Go provides a user-friendly digital experience that strengthens community engagement, improves access to mosque services, and encourages young adults to build a closer connection with the mosque.
