PENGAJIAN KEJURUTERAAN AWAM

UNIVERSITI TEKNOLOGI MARA CAWANGAN PULAU PINANG

Message from Ketua Pusat Pengajian

Assalamualaikum Warahmatullahi Wabarakatuh and greetings,

It is a pleasure to welcome you to the 2025 edition of Buletin FKA. This bulletin brings together the activities, achievements and memorable moments of the School of Civil Engineering, UiTM Cawangan Pulau Pinang throughout the year.

Looking back, 2025 has been a meaningful year for our School. While the achievements recorded in this bulletin deserve recognition, I believe our true strength lies in the people behind them. Every programme, student activity, research initiative and community engagement reflects the time and effort contributed by our lecturers, administrative staff, technical staff and students.

As educators, our responsibility extends beyond delivering academic content. We must prepare our students to think carefully, act professionally and respond confidently to the challenges they will encounter as civil engineers. The engineering profession continues to change, and our students must be ready to work with new technologies while remaining attentive to public safety, environmental concerns and the needs of society.

I am particularly grateful for the cooperation shown by everyone throughout the year. Some contributions are clearly visible through awards, publications and successful programmes, while many others take place quietly behind the scenes. Both are equally important to the continued success of our School.

To our students, I encourage you to make full use of every opportunity available during your time at UiTM. Academic knowledge provides the foundation, but your willingness to learn, communicate and take responsibility will shape the kind of engineer you eventually become.

I would also like to thank our alumni, industry partners and collaborators for continuing to share their knowledge and experience with us. Their involvement helps ensure that our teaching and activities remain relevant to professional practice.

Finally, congratulations to the editorial team and everyone who contributed to this edition. I hope Buletin FKA 2025 will serve as a meaningful record of our shared journey and remind us of what we can accomplish when everyone contributes.

Thank you and Wassalam.

GEOTREN IFTAR 2025: Fosters Ramadan Spirit

Siti Fatimah Sadikon, Mazlina Razali, Khairul Afinawati Hashim, Roziah Keria, Rozaini Ramli, Juliana Idrus, Masyitah Md Nujid and Azura Ahmad

The GeoTren Iftar 2025 was successfully held on 25 March 2025, from 6.30 p.m. to 9.00 p.m. at Level 6, Perdana Building. The event was organized to strengthen the bond of camaraderie among lecturers from Division of Geotechnical and Transporting Engineering (GeoTren) and their families in conjunction with the blessed month of Ramadan.

The event brought together lecturers and their families in a warm and harmonious atmosphere. Guests began arriving as early as 6.30 p.m. for registration and preparation for the breaking of fast. Prior to the iftar session, the event featured a knowledge-sharing session delivered by Tuan Haji Anas Ibrahim. In his talk, he highlighted the virtues of the month of Ramadan and emphasized the importance of making the most of it through meaningful acts of worship to gain abundant rewards.

Upon the arrival of iftar time, the programme proceeded with a recitation of *doa*, followed by the breaking of fast with water and dates. This was subsequently followed by the congregational Maghrib prayer. Upon completion of the prayer, guests were invited to enjoy the iftar meal, which featured a variety of dishes including *nasi campur*, desserts, cocktail, as well as hot and cold beverages.

The event was further enlivened by cordial interactions among lecturers and their families, thereby strengthening relationships within the GeoTren community. It is hoped that such programs will continue in the future as a platform to foster unity and strengthen the spirit of togetherness among members of the faculty.
