ACKNOWLEDGEMENT

Alhamdulillah, all praise to Allah S.W.T, the sustainers of the world and may there be HIS blessing to all messengers, the prophet Muhammad S.A.W and his family, Companions, followers and the believers till the end of time. I am deeply relieved and thankful that this research paper has finally been completed.

I would like to acknowledge the Creator of my good self for giving me the inner strength, knowledge, skills and good health for me to complete this project paper.

First and foremost, my deepest and highest gratitude goes to both of my parents, Encik Mathar bin Ismail and Zaleha binti Ab Talib for giving me all the support and encouragement in completing this paper. Thank you for everything.

My second thanks goes to my thesis supervisor, Miss Afazan Nor Binti Hj Talib for their patience, guidance and support throughout the completion of this research paper. His guidance has actually helped me in producing a good paperwork that is beyond my capabilities. Beside that, his constant critic's and brilliant ideas have helped me in making his paperwork to be a result with good quality.

In addition, I would like to express my gratitude to my supervisor Puan Siti Nor Ashikin Binti Kamal, Human Resource Manager of Care Ion Technologist Sdn Bhd, who have help me in completing this research paper by giving guidance, support and information that I really need during the completion of this research paper. To all those that have helped me in distributing the questionnaires, thank you so much.

ABSTRACT

Purpose - It is often suggested that in order for safety and health to positively influence worker performances. The purpose of the present study is to examine the relationship between safety and health with worker performances at Care Ion Technologist.

Design/methodology/approach - Data were collected from 53 employees from 6 departments at Care Ion Technologist.

Findings - Results from a survey of 53 employees showed that the relationship between safety and health with worker performances at Care Ion Technologist.

Research limitations - Time consuming: Duration to complete this research is too short
Limited resources - Occurs when the information gains from the respondent are not enough. Participation feedback - difficult to get responses and cooperation from them. This is because they have to carry out of their job.

Practical implications - These results have important managerial implications: in order to obtain positive employee outcomes, organization should provide good safety and health in order to improve the worker performances.

Originality/value - This study contributes to the knowledge on a study relationship safety and health with worker performances.

Paper type Research paper
