

UNIVERSITI TEKNOLOGI MARA

**A STUDY ON PERCEIVED EASE OF USE
AND KNOWLEDGE OF FARMERS IN
KADA, KELANTAN TOWARDS
HERBICIDE APPLICATION ON PADDY
FARMING**

NUR HIDAYAH BINTI MOHD NAWI

Final year project report submitted in partial
fulfilment of the requirement for the degree of
**Bachelor of Science (Hons.) Plantation
Technology and Management**

Faculty of Plantation and Agrotechnology

January 2015

CANDIDATE'S DECLARATION

I declare that the work in this research was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

In the event that my Final Year Project is found to violate the conditions mention above, I voluntarily waive the right of conferment of my banchelor degree and agree to be subjected to the disciplinary rules and regulations of Universiti Teknologi MARA.

Name of Candidate : **NUR HIDAYAH BINTI MOHD NAWI**

Candidate's ID No. : 2012287254

Programme : BSc. (Hons) Plantation Technology and Management

Faculty : Plantation and Agrotechnology

Research title : A Study on Perceived Ease of Use and Knowledge of
Farmers in KADA, Kelantan towards Herbicide
Application on Paddy Farming

Signature of Student : _____

Date : 30th December 2014

ABSTRACT

Oryza sativa L. or paddy from family Poaceae is one crop in Malaysia become an important staple food in the daily lives of their people. According to the Statistics Unit, (2012), the total population increased from 27.90 million in 2009 to 28.25 million in 2010. The rapid incremental of population have influence the demand for paddy increased. It has become a challenge for us to meet that demand by producing the high yield of paddy. However, but there are several constraint that prevent from achieving high rice yield, among these are the problem of weeds in paddy fields. Weeds are the unwanted plant that competes with our crop in term of light, nutrient and also space which is directly affect the yield production of paddy (Hamid, 2012). Weeds control is really needed to all types of paddy cultivation whether it is upland rice or lowland rice in order to increase the paddy production. But nowadays, due to the increase of weeds population, labour in shortage supply and to increase the level of efficiency in weeds control, farmers are more recommended to use the chemical control by using herbicide as an alternative way to control the weeds beside it is more efficient and economical. It is because herbicides are very effective and take a short time work (Kosina.P, 2007). Herbicide application is the most practical and efficient way in inhibit the weed competition and reducing the losses of paddy production. However, in order to achieve that mission, it is important to know whether the farmers' perceived ease of use and knowledge are really affecting the herbicide practice in their paddy fields. By knowing that, is hoped the farmers can reduce the weed population and also can increase their paddy production in efficient way. The purpose of this study is to determine whether there is relationship between perceived ease of use and knowledge of farmers towards herbicide application to control weed infestations in their paddy fields. Based on the use of questionnaires that will conducted in the study area which is Pertubuhan Peladang Kawasan Bukit Jawa (PPK Bukit Jawa), about 120 of paddy farmers' perceived ease of use and knowledge towards herbicide application will investigated. The quantitative data will analysed by Multiple regression analysis. At the end of this study, result revealed that the perceived ease of use and knowledge level of farmers give significant effect to them to apply herbicide in their paddy field. But, the factor that more influences them is perceived ease of use related to herbicide application in weed population control. It is recommended to find out the perceived ease of use and knowledge level of paddy farmers that operate the large scale of paddy plantation, purposely to obtain more perceived ease of use or any brilliant idea that can improve the weed management and surely can increase the yield production of paddy.

APPROVAL SHEET	i
CANDIDATE'S DECLARATION	ii
ABSTRACT	iii
ABSTRAK	iv
ACKNOWLEDGEMENT	v
TABLE OF CONTENT	vi
LIST OF TABLES	viii
LIST OF FIGURE	ix
LIST OF ABBREVIATION	x
CHAPTER 1 INTRODUCTION	1
1.1 Backgroud of study	1
1.2 Problem statement	2
1.3 Objectives of study	3
1.4 Significance of study	3
CHAPTER 2 LITERATURE REVIEW	4
2.1 Paddy	4
2.2 Kemubu Agricultural Development Authority (KADA)	4
2.3 Weeds problem in rice	5
2.4 Types of weed	6
2.5 Rice yield loss due to weeds infestation	11
2.6 Weed management in rice	11
2.6.1 Weed prevention	12
2.6.2 Physical control	12
2.6.3 Biological control	12
2.6.4 Chemical control	13
2.6.5 Cultural control	13
2.6.6 Integrated weed management (IWM)	13
2.7 Herbicide	14
2.7.1 Types of herbicide	14
2.7.2 Side effect of herbicide	15
CHAPTER 3 RESEARCH METHODOLOGY	17
3.1 Location of study	17
3.2 Population and sample	17
3.3 Scopes and limitations of study	18
3.4 Research questions	18
3.5 Hypothesis	18
3.6 Theoretical framework	19
3.7 Parameters	21
3.8 Instruments of survey	21
3.9 Method of data collection	25

3.10	The flow chart of data analysis	26
3.10.1	Distributing the questionnaires	27
3.10.2	Getting ready for data analysis	27
3.10.3	Method of data analysis	28
CHAPTER 4 FINDINGS AND DISCUSSION		31
4.1	Introduction	31
4.2	Demographic information	31
4.3	Descriptive analysis	34
4.4	Reliability analysis	36
4.4.1	Correlation between items for independent variables (<i>Perceived ease of use of farmers towards herbicide application</i>)	37
4.4.2	Correlation between items for independent variables (<i>Knowledge of farmers towards herbicide application</i>)	38
4.4.3	Correlation between items for dependent variable (<i>Herbicide application</i>)	38
4.5	Factor analysis	39
4.5.1	Factor analysis for independent variables	39
4.5.2	Factor analysis for dependent variables	42
4.6	Multiple regression analysis	42
4.7	Discussion	45
4.7.1	Demographic information	45
4.7.2	Descriptive analysis	46
4.7.3	Multiple regression analysis	46
CHAPTER 5 CONCLUSION AND RECOMMENDATION		49
5.1	Recommendation from the findings	49
5.2	Recommendation for future study	50
5.3	Conclusion	50
