Acknowledgments

Firstly, I gratefully acknowledge my parents for their advice and crucial financial contribution, which made them as my spirit of strength to complete this research and. My parent's involvement nourished my intellectual maturity that I will benefit from, for a long time to come. Mum and dad, I am grateful in every possible way and hope to keep up all the encouragement that I get from both of you.

I would like to thank to my family members, sisters and brothers for supporting and encouraging me to pursue this study. Without my family encouragement, I would not have finished this study.

Many thanks go in particular to Dr. Salim Bin Abd Talib which is my supervisor. The most important person who help me a lot and give me an advice to finish this thesis is Prof. Madya Dr. Rahmat Bin Hashim, thank you so much Dr. Not to forget, I am much indebted to Siti Norfatihah for financial support, Professor Madya Dr. Yusri Ahmad and Kamalia Yusuf for their valuable advice in discussion, commenting, supervision in this research and furthermore, using their precious times to read this thesis and gave their critical comments about it. I gratefully thank to Aiman Aliff Abd Halim and Along-Massyittah Omar for their constructive comments on this thesis and encourage me a lot when I need it without giving up. I am thankful that in the midst of all their activity, they accepted to be among the entire person to live up my spirit and encouraging me a lot.

It is a pleasure to pay tribute also to the people who helping me when I need them. To Professor Dr. Myoukei sensei and Masayoshi Uchida who always gave me a comment on this thesis and contribute some ideas, Domo arigato gozaimasu!

Thank you all.

Abstract

This study takes a quantitative case study approach exploring the factor influence the level of traditional food knowledge. Traditional food knowledge (TFK) refers to a cultural tradition of sharing food, recipes and cooking skills and techniques and passing down that collective wisdom through generations. Through from this knowledge it is finding that there has a several factor influencing the level of traditional food knowledge such as formal learning, informal learning and social life style. The paper aims to investigate the relationship between factors influencing the level of the traditional food knowledge. The aim for this study was to determine how a young generation which is teenagers view the world of cooking and food especially on traditional food knowledge. From the reports, it shows that, young generations display a dissimilar food culture when they involve in learning which is formal and informal learning and also in social life style. The study was carried out with a total of respondent of 212 students and more specific is young generations in five secondary schools in east coast, Malaysia which is located in Temerloh, Pahang. From the result are shows that, there was no significant relationship between young generations' factor influence and the level of traditional food knowledge. For the conclusion, the final have been conclude saying that, there have a several factor contribute to the hypotheses showing why there are no relationship at all.
