

**“FINITE ELEMENT ANALYSIS OF PROFILED STEEL SHEET
DRY BOARD SYSTEM AS A WALLING UNIT
WITH DOOR OPENING”**

*A report submitted to Universiti Teknologi MARA in partial fulfillment of the
requirements for the Bachelor Degree of Civil Engineering (Hons) (Civil)
in the Faculty of Civil Engineering.*

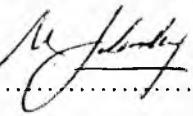

Presented by:

ABSTRACT

Composite engineering component which may consist of two or more materials, connected or combined to give a performance in service, which is superior to the properties of its individual materials.

Profiled steel sheet dry board (PSSDB) is a composite system, which classified into macrocomposite system comprises of Profiled steel sheet, cemboard and connected by self-tapping screw. This system when combined imposed strength and stiffness.

The proposed of this system as a load-bearing wall give more advantages in building construction. It's a lightweight structure, easy to fabricate and save a lot of time for installation work.

In this study, Profiled Steel Sheet Dry Board has been treated as load-bearing wall, where it's due to door opening using finite element method (LUSAS) has been analyzed. The model analyzed measures three metres wide and three metres high. An opening of 926 mm by 2040 mm is modeled as door opening in symmetrical position.

LUSAS 13.3 software adopted to create the finite element model. The model was modeled using 3D thin shell elements as a profiled steel sheet (Bondek □) and dry board (Cemboard).

A series of load had been assign to this model and the result are stated as follow; for total load of 256 kN the maximum displacement is 5.969 mm, for maximum stress is 391.50 N/mm² occurs at node 32837 and for the maximum strain is 0.2785E-2.

KEYWORDS: Profiled Steel Sheet; Dry Board; Composite; Lightweight

CHAPTER ONE

1. INTRODUCTION	1
1.1 GENERAL	1
1.2 PROBLEM STATEMENT	3
1.3 OBJECTIVE OF STUDY	3
1.4 SCOPE OF WORK	4

CHAPTER TWO

2. LITERATURE REVIEW	5
2.1 BEARING WALL	5
2.2 STEELS	5
2.2.1 CATEGORIES OF STEEL	6
2.2.1.1 Structural Carbon Steel	6
2.2.1.2 High Strength Low-Alloy Steel	7
2.2.1.3 Heat Treated Carbon Steel	7
2.2.1.4 Heat Treated Construction Alloys	7
2.2.1.5 Managing Steel	7
2.2.2 MECHANICAL FORMING PROCESS	8
2.2.3 STRESS-STRAIN RELATIONSHIP IN STRUCTURE STEEL	8
2.3 FASTENER	10
2.3.1 MECHANICAL FASTENER	10
2.3.1.1 Self-Tapping Screw	10
2.3.1.2 Self-Drilling Screw	11
2.3.2 MECHANICAL PROPERTIES OF CONNECTIONS	13
2.3.2.1 Strength	13
2.3.2.2 Stiffness	14
2.3.2.3 Deformation Capacity	14
2.3.3 FORCES IN CONNECTIONS	14
2.4 INTRODUCTION OF PSSDB SYSTEM	20
2.4.1 PSSDB SYSTEM	20
2.4.1.1 Profile Steel Sheet	21
2.4.1.2 Dry Board	24
2.4.1.3 Connector	26
2.4.2 ADVANTAGES OF THE PSSDB SYSTEM	27
2.4.3 PSSDB AS WALLING UNITS	28
2.4.4 OPENING	28
2.5 LOCAL BUCKLING OF PROFILE STEEL SHEETING	29
2.6 BUCKLING OF THE DRY BOARD	29
2.7 DESIGN ADVANTAGES OF SANDWICH STRUCTURE	30

CHAPTER THREE

3. FINITE ELEMENT ANALYSIS (LUSAS)	31
3.1 FINITE ELEMENT HISTORY	31
3.2 FINITE ELEMENT METHOD	33
3.2.1 FEM in Structure Analysis (procedure)	34
3.2.2 Defining the model geometry	35
3.2.3 Model Attributes	35
3.2.3.1 Meshing	36
3.2.3.1.1 Meshing properties	36
3.2.3.1.2 Mesh Types	37
3.2.3.1.3 Mesh view properties	38

3.2.3.2 Geometric Properties	39
3.2.3.3 Material Properties	39
3.2.3.3.1 Linear and Nonlinear Material Properties	39
3.2.3.3.2 Joint Material Properties	40
3.2.3.4 Loading Properties	41
3.2.3.4.1 Structural Loading properties	42
3.2.3.5 Support Conditions	44
3.3 LUSAS ANALYSIS TYPES	45
3.3.1 Standard Stress Analysis	45
3.3.2 Non Standard Analysis Types	46
CHAPTER FOUR	
4. METHODOLOGY	48
4.1 RESEARCH METHODOLOGY	48
4.2 LUSAS PROGRAMME	49
4.2.1 Pre-Processing	49
4.2.1.1 Creating a Model	49
4.2.2 Finite Element Solver	50
4.2.3 Result-Processing	50
4.3 PREPARATION OF DATA	52
4.4 IDEALIZATION OF THE MODEL	52
4.5 ATTRIBUTE	55
4.5.1 MESHING	55
4.5.1.1 Three dimensional Flat Thin Shell Element	56
4.5.1.2 Three dimensional Elements for Engineering, Kirchhoff and SemiLoof /SemiLoof Beams Joint	57
4.5.2 GEOMETRY	59
4.5.3 MATERIAL	61
4.5.4 SUPPORT CONDITION	64
4.5.5 LOADING	67
4.5.6 ASSIGN AND SOLVE	68
CHAPTER FIVE
