ACKNOWLEDGEMENT

First and foremost, I would like to pay my gratitude to Allah S.W.T for giving me the strength to complete my final research paper. Thank you for giving me the guidance and courage for me to be able to finish my research paper.

A special thank to Puan Zaidah Bt Ibrahim who act as my supervisor, for her patience, dedications, guidance and also who has been contributing so many ideas for my research paper. She has also supervised me starting from my proposal paper until the completion of this research. This research cannot be completed without her support and encouragement.

I would also like to thank my family and friends for giving me their support towards the process of developing my final research.

TABLE OF CONTENTS

		Page
ACKNOWLEDGEMENT		ii
LIST OF TABLES		viii
LIST OF FIGURES		ix
ABSTRACT		xii
CHAPTER 1: PROBLEM DESCRIPTION		
1.1	Background of the Problem	1
1.2	Problem Description	5
1.3	Problem Scope	6
1.4	Problem Significance	6
1.5	Outline of the Following Chapters	6
CHAPTER 2: LITERATURE REVIEW		
2.1	Introduction	8
2.2	Computer Virus Timeline	8
2.3	Life Cycle of a Virus	13
	2.3.1 Creation	13
	2.3.2 Replication	13
	2.3.3 Activation	13
	2.3.4 Discovery	14

	2.3.5 Assimilation	14
	2.6.6 Eradication	14
2.4	Why *they* write viruses code?	16
	2.4.1 Special weapons for the future.	16
	2.4.2 Inside the viruses writer's mind.	17
	2.4.3 Everybody wants to be popular.	18
2.5	Detail description of computer virus.	19
	2.5.1 Classification of harmful program code.	19
	2.5.2 Type of computer viruses	23
	2.5.3 Characteristics of Computer Viruses	37
	2.5.4 How Computer Virus Spread	42
2.6	Description of the cure from computer viruses attacks.	46
	2.6.1 Tools for Anti-Virus	46
	2.6.2 How an Anti-Virus Program Works?	50
	2.6.3 The effective viruses' solution	52
	2.6.4 Another method for viruses' solution	56
2.7	What is Artificial Neural Network?	62
	2.7.1 How ANN Learn?	63
	2.7.2 Where are Neural Networks being used?	63

ABSTRACT

Many organizations and users are working hard to secure themselves from the growing threats of computer viruses, Trojan horses, worms, and other malicious codes. Computer viruses attacks are problems created by men or women and they are problems that can also be controlled by men or women. In the end, it is basically a war between virus writers and virus fighters. There are bright minds on both sides, and it looks like this fight is not going to end. This research intends to find the pattern of computer viruses attacks and perform a prediction on the next occurrence of virus. Other than that, this research also will propose a new way to cure from computer viruses attacks. The findings of this research are hope be able to shed some light for all of us.
