

ADHESION OF NC LACQUER ON 3 DIFFERENT SANDED SURFACES OF KELEMPAYAN TIMBER

RADHIAH BINTI ABD AZIZ

**Final Year Project Paper Submitted in Partial Fulfillment of the Requirements for
Bachelor of Science (Hons.) Furniture Technology
Faculty of Applied Sciences, Universiti Teknologi MARA**

JULY 2015

CANDIDATE'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulation of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any other degree or qualification.

In the event that my thesis is found to violate the conditions mentioned above, I voluntarily waive the right of conferment of my degree and agree to be subjected to the disciplinary rules and regulation of Universiti Teknologi MARA.

Name of candidates: RADHIAH BINTI ABD AZIZ

Candidate's ID.Num. : 2013240594

Programme : Bachelor of Science (Hons.) in Furniture Technology

Faculty : Applied Sciences

Thesis title: Adhesion of NC lacquer on 3 different sanded surface of kelempayan timber

Signature of Candidate: _____

Adhesion of NC lacquer on 3 different sanded surfaces of kelempayan timber

ABSTRACT

This research project was carried out to determine the adhesion lacquer on sanded surface of timber. Kelempayan timber was used for this purpose. 3 types of grit of sand paper had been use. Timber prepared to moisture content 12%. Cross cut test were applied based ASTM D3359 09'2. Result show that 80 grit size gave better result. It is significant different. It can be concluded rough surface better adhesion.
