ABSTRACT

Baby-Daily is a mobile application for monitoring baby's health that can be used by parent, caregiver and doctor. This application is developed to keep the baby's health condition based on the statistical report that been generated through the parent or caregiver interaction on the events. It is because to overcome the problem that occur towards new parents that not well prepared for their newborn baby. This application also providing the reminders features that will notify the parent about their baby's incoming events and help parent to be more prepared in handling their baby. In this application there is a platform for doctor to write and share their knowledge through this application. It is because the information in internet inaccurate. This application also comes with many features such as chatting platform, video streaming, medical post, reminder and notifications for all users for delivering useful information specifically about baby. It can help the parent to take care of their baby properly without any problem and misleading information. Besides, Baby-Daily also help parent to keep notify their incoming appointment with hospitals also vaccination. Furthermore, based on the result of usability testing, it shows that 93.3% agreed that they satisfy with this overall application.

TABLE OF CONTENT

CONTENT	PAGE
SUPERVISOR APPROVAL	ii
STUDENT DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	ix
LIST OF TABLES	xiii
LIST OF ABBREVIATIONS	xiv

CHAPTER ONE: INTRODUCTION

1.1	Project Background	1
1.2	Problem Statement	2
1.3	Project Objective	4
1.4	Scope of Project	4
	1.4.1 User	4
	1.4.2 Platforms	5
	1.4.3 Mode	5
1.5	Significance of Project	5

CHAPTER TWO: LITERATURE REVIEW

2.1	Baby's Care	7
2.2	Mobile Application	9
2.3	Real Time Application	11
2.4	Video Streaming	11

2.5	Data Synchronization	13
2.6	Chat	14
2.7	Related Work	16
2.7.1	Baby Connect	16
2.7.2	Baby Care	17
2.7.3	Baby +	18
2.7.4	Comparison	19
2.8	Summary	20

CHAPTER 3: METHODOLOGY

3.1	Waterfall Methodology	21
3.2	Requirement Analysis Phase	22
3.2.1	Gantt Chart	27
3.3	System Design Phase	28
3.3.1	System Architecture	29
3.3.2	Activity Diagram	31
3.3.3	Entity Relationship Diagram (ERD)	34
3.3.4	User Interface Design	35
3.4	Development Phase	75
3.4.1	Modules	75
3.4.2	Hardware and Software	78
3.4.3	Technologies Used	79
3.5	Testing Phase	83
3.5.1	Functionality Testing	83
3.5.2	User Acceptance Test	83
3.5.3	Performance Testing	84

CHAPTER 4: FINDINGS AND RESULTS

4.1	Functionality Testing Result	85
4.2	Usability Result	86
